New Jersey and Virginia to Be Dismantled and Sold

Although the battleships New Jer-sey and Virginia, now at the Charlestown Navy Yard, were included in the list of vessels to be scrapped for naval purposes by the United States as a result of the Conference on Limitation of Armaments, it has been de-cided in Washington that they shall be saved for commerical purposes.
They probably will be sold for use in the shipping service. Their guns and other fighting material will be removed, but otherwise they will not be changed, so far as is known now at the New Yord Roth have been out consists of nine members elected at

changed, so far as is known now at the Navy Yard. Both have been out of commission since Aug. 6, 1920.

Classed as second-line battleships, the New Jersey and Virginia are sister ships and identical with three others, the Georgia, the Nebraska and the Rhode Island. All were completed in 1906, except the Nebraska, completed in 1907. The New Jersey was built at the Fore River shipyard and the Virginia at Newport News. Their dimensions and the statistics relating to them are: Normal displacement, 14,948 tons; full load displacement, 16,094 tons; waterline length, 435 14,935 tons; full load displacement,
16,094 tons; waterline length, 435
feet; beam, 76 feet; maximum
draught, 26 feet; length over all, 441
feet. Their armor amidships is 8inches to 11 inches thick, with 4-inch
belts at the ends and a 3-inch deck;

Fach was designed for 25.463 horse for it the merit that it is more democratic, in that it brings the council nearer the people and gives every district its own representative in the council. It is true the proposed plan would give each voter a larger share would give each voter a larger share and the Virginia 1142 officers and \$50,000, with the bond payments Each was designed for 25,463 horseto 19.54 knots. The New Jersey carried a crew of 1118 officers and men and the Virginia 1142 officers and

California Court Rules They May Hold Land for American-

MARYSVILLE, Cal., March 11 (Special) — American-born children of Japanese parents, even though these parents were natives of Japan and never have been naturalized in the United States, may buy, own and sell land in California, according to a decision, the first of its kind in this country, rendered by Judge E. P. McDaniel in the Superior Court here on

The court also decided that Japa-ness parents may buy for their minor American-born children lands in Cali-fornia, so long as these lands are held for the children. Nothing is said in the decision regarding the right of Japanese parents to sell such lands for their children.

Japanese parents to sell such lands for their children.

The decision was rendered in the case of the State of California against Jusuke Shingu and his two minor children, for whom Mr. Shingu purchased land for \$3500 from G. L. and Mary Douglas, in Sutter County, in April, 1919. In rendering the decision and late and the same of the favored the California anti-slien) land law, severtheless, the right of any American-born person to buy, sell, and own land, under the Constitution must be upheld, and there was not severe, that the father may not advanced to coupy or operate the land for himself. The law does provide, however, that the father may not advanced to coupy or operate the land for the benefit of his minor children.

U. S. Webb, Alforner-Goneral, will appeal the decision, since there are some \$9,000 Japanese children in California, whose parents under the decision, may buy and hold land for the case of the state of california anti-slien) appeal the decision, as of the commissioners. MUNICIPAL LIGHT PLANT SALE ISSUE **PUT BEFORE VOTERS**

Wakefield Citizens to Decide Whether They Will Dispose of the Service

Next Monday night the voters of Wakefield will pass upon the question of whether or not the lighting plant owned by the town for 28 years shall be sold to a company that offers \$300,000 for it. Because this plant has been a cause of controversy for the 28 years of its existence there will be wide interest in the action of the voters. Advocates and opponents of public ownership of utilities will find in the result material for argument. The history of the town's experiment The history of the town's experiment-is full of records of difficulties, and there have been frequent demands that it should cease. Some of these, of course, have been inspired by the opposition of corporations, but not a few of the citizens of Wakefield have become econvinced that public ownership is unprofitable.

It is believed, however, by those who have followed closely the developments of this experiment that reasons for its non-success are to be found in certain restrictions and faulty management of details rather than in the project as a whole. The publiclywned water plant has for many year paid its way and provided a surplus. Why, then, the local students of the question ask, has not the lighting

lant been an unqualified success?

If the offer for the plant is accepted, the town will receive in cash about \$210,000 after bonds and other obligations are liquidated. The company promises that if it can get permission from the Public Service Commission so to do it will cut rates so that Wakefield will get a gas rate of \$1.45 while its neighbors pay the same company \$1.20 per 1000 cubic feet. In about five years, the company states, the differential should be eliminated. On electricity, under the same conditions, the rate would be 91/2 cents net per kilowatt hour in Wakefield and 81/2 cents elsewhere, with the same out-look, or better, for ultimate equalization with the other cities of the

There are some citizens who would like to see an alternative proposal, based on a smaller price for the franbased on a smaller price for the franchise and a lower rate to start. This desire comes about mainly because stress has been laid on the fact that in the last two years alone Wakefield consumers have paid in rates between \$35,000 and \$50,000 more than they would have spent had they lived in any adjoining community, and because the money received from any sale would go into the town treasury instead of the consumers' pockets.

Wakefield's main difficulty in mu-

Wakefield's main difficulty in mu-nicipal operation of its lighting plant lies in the fact that quantity produc-tion is restricted to Wakefield. Flanked on all sides by cities and towns served by private corporations, the town can make gas and electricity only for it-self. It is a rapidly growing town, but the addition of even a hundred the 12 years of its four being submerged.

The machinery of each ship concists of two sets of four-cylinder into the system which to which we are now on the New Jersey and Niclausse on the New Jersey and Niclausse on the Virginia. Their normal coal load is 900 tons, with 1967 tons maximum. Each was designed for 25.463 horse. indebtedness only a little more than \$50,000, with the bond payments amounting to less than \$10,000 a

There are other factors that enter GIVEN JAPANESE into the Wakefield situation. With the exception of a water-gas set bought a year ago, the machinery, for the most part, is antiquated. The present manager declares that \$52,500 should be spent at once and the commissioners concur with him in the belief that the town should vote this, or quit and sell out. Citizens who lived in Wakefield back in 1894 say that the town did not get much for its money when it invested \$146,000 in the works; in fact, they recall that the move then toward municipal operation was prompted by the poor service given by the old, private com-pany. In the 28 years that have pany. In the 28 years that have elapsed, the commissioners and managers have not had the freedom enjoyed by executives of private cor-porations.

Expenditures that might have pre vented the conditions now existing were more often than not frowned upon by well-meaning but not wellinformed "watch dogs of the treas ury," whose arguments in behalf of "economy and reduction of the tax rate" more often than not swayed the voters away from the ideas of the commissioners. Men from all walks

E. S. MONTAGU DEFENDS ACTION IN PUBLISHING INDIAN APPEAL

Outstanding Features of Indian Situation

E. S. Montagu warns Great Britain against the danger of al-lowing the Lloyd George Government to betray the people into broken pledges in a speech up-holding his action in sanctioning publication of the famous memorandum from India calling for revision of the Sèvres treaty.

Mahatma Gandhi, leader of the Non-Cooperation movement in India, who was arrested last night at Ahmedabad, has cautioned his followers against disturbances.

Lord Derby, who has been named as a likely successor to Mr. Montagu, is remembered as the man whose efforts last year were fruit-ful in reconciling conflicting opinions in Ireland.

believe that, it has been efficient in the main, but there have been periods when doubt on this point existed, and there was one period when there was no doubt. It was this period that brought Wakhfield to the crisis. Today the plant is managed by a technical expert. He has been under fire during his year of service, and all but a few of his critics admit that progress has been made. The progress possible with the present equipment has come to an end; upon this all agree. Wakefield faces these alternatives:

To spend more than \$50,000 this year and probably as much more another year to rehabilitate the works, with no prospect of reduction of rates while this added debt is carried.

To sell to the Malden and Melrose Company, which has offered \$300,000 for the plant and franchise. To go on following the old policy of patching here and there as necessity de-mands, without hope of ever bringing tation to the Russians to participate rates down to anywhere near a par with those of surrounding communi-

CLOSED BANK

The full bench of the Supreme Judicial Court has decided that the Forelga Trade Banking Corporation is entitled to recover, upon proof of claim, \$157,803.31, plus interest at 5 per cent, from the closed Gosmopolitan Trust Company. The case was reported to the Supreme Court without decision by Judge George A. Sandarson of the Superior Court.

Joseph C. Allen, State Bank Commis-sioner, closed the Cosmopolitan Trust

The plaintiff company claimed payowed much less because of the fluctufendant appraised this amount as \$157,803.31. The Supreme Court supports this contention, finding that the plaintiff is entitled to recover, on proof of claim, principal as fixed by rate of exchange on day of demand. The accrued interest, according to computation by the defendant, is \$7,-890.17, making the total amount \$165,-

Retired Cabinet Minister Bitterly Attacks the British Premier

Mr. Lloyd George's Methods of Government Are Called "Notorious"

LONDON, March 11 (Special Cable -Edwin S. Montagu, who has just resigned as Secretary of State for India, defended his action in sanctioning publication of the now famous memorandum of the Viceroy in a violent speech before his constituents at Cambridge today. Nothing, he said, could be more fatal to a continuance of the British Empire than any vacillation or preschool faith in Greet British. breach-of faith in Great Britain's Indian policy. That was the danger now confronting the country through Mr. Lloyd George's attitude. "It is said," he added, "I have wantonly out-raged the historic doctrine of cabinet responsibility cherished by the Brit-ish people. The suggestion is ridicu-lous and preposterous. The fact is we have in supreme control at the presservices to the Empire are too well known for me to elaborate, but the notorious price we have to pay for this transcendent genius is not only domestic tolerance of his colleagues, but complete abrogation of cabinet responsibility by the Prime Minister

imself." Proceeding, Mr. Montagu said that although the cabinet authorized the discussion with the French and Italian governments as to the terms on which it would be possible to consider recognition of the Soviet Government, in the Genoa conference was never discussed in the cabinet at all.

The Geddes Report do not believe that municipal owner-ship has "failed," in the ordinary action in dealing with the report of sense of the word, but they realize Lord Milner's mission to Egypt, Mr. that the time has come when a private Mortage said: "I come to a more replant with an almost unrestricted field and with the economy of quantity production can profitably add to the Geddes committee's report was published in all the newspapers of whereas the Wakefield plant never the country and, of course, there were many aspects of the Irish settlement. whereas the Wakefield plant never the country and, of course, there were can do more than serve its own commany aspects of the Irish settlement that were never before the Cabinet until the period when the Cabinet

reached must be by the unanimous consent of all. Two Main Objections

. I maintain that there is nothing in the treaty itself that justifies such an interpretation being placed upon it; that an agreement by a man upon it; that an agreement by a man or a nation to respect the rights of his neighbors is an obligation that relates to his own conduct and does not bind him to aggressive action because the other party to the contract, whose rights he has agreed to respect, becomes involved in difficulties.

"But the question is not left here. The Foreign Relations Committee of the Senate have moved a reservation to the Treaty, which beyond a doubt will be accepted by the Senate, which reads as follows:

"The United States understands that under the statement in the pre-

Treaty, there is no commitment to armed force, no alliance, no obliga-

inderstanding on the part of our nment, what ground is left to

stand upon? None that I can see.
"On the other hand, it is asserted t, as the treaty does not bind the in carrying out its terms, and because they cannot in the future be bound to tained, that it means nothing; that it is worse than useless to sign it, and therefore it should be defeated. To my mind, this argument is the last stand of the men of the old school, the school of thought that has been minant in the government of this orld for the last 4000 years; the that believes that the orld can and must be governed only pinding, must have the power of force sehind them. If this were true, it uld destroy all the faith of the Christian nations of the world in their rts to obtain peace by mutual

mutual understanding. The present MAYOR ORDERS DAY treaty is not an alliance, but if it were an alliance, intended to keep the peace through arbitration rather than through force, I should support it. The dangers of past alliances have not been due to the fact that they were binding agreements between the essary for an underground street lication of the Government of the street powers that signed them, but because railway foop by day labor rather than shown that he had warned the Government of the contract. powers that signed them, but because they contemplated the use of force for the benefit of the signatory powers. An alliance based on right and justice ter which he sent to the City Counbetween nations, intended to aid in cil for consideration on Monday, will expected as a contribution to east-between the peace of the world, would cost about \$2,0500,000, and will religious suzerainty of the Khilafate ligious suzerainty of the Khilafate

Effect of Treaty

"If the Senate of the United States satisfied there will disappear not only any real cause for war, but there will no longer exist the opportunity for war that has threatened us in the past two decades, and peace will be established between the four great sea powers that now control the destinies of the Pacific Ocean.

It was because Lord Reading asked

the last Indian debate in the House
of Commons, rising ostensibly to support the Minister for whose policy
and administration he is responsible
by every detrine of Cabinet responshilty, did not say a single word in
defense of that Minister, but extravagantly complimented the speeches of
his accusers. The "dis-horde" had inhis accusers. The "die-hards" had instigated a riot and revolution by their lack of sympathy with progress. They have femented unrest in the Indian services by a baseless rumor of lack of supports. All the prejudices of the "die-hards" were concentrated on my removal, because I was a Liberal and was pursuing an imperial policy."

After warning the country against the danger of allowing the govern-ment to betray them into broken pledges, Mr. Montagu concluded with George as an ungrateful and uncom fortable master to those ministers who would really serve him.

Moderate Opinion in India

LONDON, March 11 (Special Cable) fortunate moment, since India will in partisan elections were strongly certainly associate it with the fall of against a district council, yet there are those who advocate the change to the Secretary of State, whose special help Republican wards, which have protection Mr. Gandhi rightly wrongly, believed he enjoyed. A remarkable change, however, is coming over the solid mass of moderate opinion, which always eventually sways the balance of the politically minded elements in India. A month ago the majority of the Indian members of the Legislative Assembly at Delhi would undoubtedly have supported, in the strongest possible manner, any proposal for the release of the imprisoned Ali brothers, who long occupied a forefront position in the movement for independence in India, differing from Mr. Gandhi only in that the methods they inculcated did not exclude the immediate application of physical force.

Two days ago, however, when a motion to this effect came up in the Assembly and the British home meminternal situation in India, not a single rose to vote against retention of these dangerous agitators in confirement. nuisance if it can be employed in-This means in India more than would definitely merely in the hope of be the case anywhere else in the world, eventually catching the other side unsecuring the peace of the world, would not be offensive to me. The first step fure the employment of not less than ligious suzerainty of the Khilafate for nowhere else is the political sense more to keep the peace among 1000 men for at least 18 months.

The first step for nowhere else is the political sense more keen to obtain individual credit for espousing the popular point of

in the election of one councillor than at present, but it would absolutely cut him off from anything whatever to say about the other 25. For the right to have something to say about 4 per cent of the council, he is asked to give up all control over 96 per cent. At present every veter has equal power at the present constitution which has hardly been in operation for a year, and to substitute some other act of the British against the Indian point of view. Practically all of the best Indian opinion has expressed its concern at the turn which Mr. Gandhi's doctrine has taken, but is not ready to go so far as government has gone in maintaining law and order. A purely Indian Government members of the British against the Indian point of view. Practically all of the best Indian point of the local properties. For this reason, the present system is not only deservedly more popular than the proposed system but also

"What did the people of Boston have to say on this question no longer ago than the very day that the members of the present Legislature were elected? They voted by a majority of 23,029 that they did not want a district council. Only seven out of the 26 wards were for a district council. Shows Remarkable Change Five of these are included in the seven smallest wards in the city. Only one Mahatma Gandhi's arrest, though in partisan elections. The other or repeatedly and emphatically shown

they do not want it. Real Majority Control "The reason for this appears to be that under the present system a real majority of the people, control and can change the membership when they will, while under the proposed sys-tem a minority would control, could not be turned out and the residential wards, with a clear majority of the total voters, would give up all chance to obtain a majority in the council in exchange for the right to tell the minority what the latter were going to do. They would sell their birthright for a mess of pottage if they accepted any such bill as this. "A thing once settled by a refer-endum should stay settled until there

is evidence of some significant change evidence of any such change-in fact,

"The referendum will become a prepared, or of exhausting it."

To Speak on Industrials Problems William M. Leiserson, the original "im-partial chairman" in settling labor disby a new realization on the part of putes and authority on unemployment, responsible Indians that the danger point is past and the time is urgent to defend themselves and all they represent. This means that the arrest of Mr. Gandhi would be accepted now connected dintimately with industrial problems. The connected in the connected dintimately with industrial problems. The connected intimately with industrial problems are realized by the property of the connected dintimately with industrial problems. far more resignedly than if it had lems in this country.

Legislature Deals With Crisis on Law and Order Issue and Defeats Censure Motion

DELHI, Jan., (Special Correspondence)-It was pointed out in a previous communication that during the autumn months the relative tactical positions of the Moderate and Exfreme parties had changed in favor of the latter. Government had embarked upon drastic action against of Sir Sankaran's letter was clearly the preachers of disorder, and in seen throughout the debate in the doing so, had alarmed the ever-timid great pressure was put upon the Viceroy to consent to a pound-table con-

change in the situation referred to above, a word of comment upon the round-table proposal is necessary. Setting aside Mr. Gandhi and his coleagues of the Extreme wing of Indian politics, the authors of the round-table idea were chiefly the more ad-vanced and active of the Indian Modthe imperial Parliament conferring upon India something like dominion home rule. and to substitute some other act of the imperial Parliament conferring

Political Changes Opposed

The truth is that the authors of the at any straw to save themselves from self can dramatize this quality into drowning; and they were not a little political action, he may be able to drowning; and they were not a little political action, he may be able to displeased when Lord Reading firmly turn the present crisis to permanent announced his intention first, to protect the new Constitution from the menace of civil commetter and, secthat with such immense forces at his ond, to await the accumulation of command and with so much idealism greater experience than that now pos sessed, before taking further steps in the direction of political reform.

Meanwhile, the resolutions passed by numerous public bodies, and the notices of motion-received in the office of the legislative Assembly in Delhi clearly showed that a determined effort would be made by the Indians elected representatives to pass cen-sure upon the action of government in arresting many prominent leaders of non-cooperation. The Legislative Assembly met on Jan. 10, by which date a large number of resolutions and other notices of motion on this ticular on that day four members attempted to secure the adjournment of the ordinary business of the Assembly for the purpose of discussing the po-litical crisis. The proceeding itself was irregular and could not possibly have provided the Assembly with a proper opportunity for pronouncing judgment on the matter in hand; therefore, the President firmly ruled it out of order.

The Bombay Meeting

By way of preparation for a pos-sible round-table conference a large number of leaders of all sections of of Indian opinion assembled in Bombay on Jan. 15 to formulate a program of action. Mr. Gandhi himself attended this meeting in an un-defined capacity. Animated debates took place and Sir Sankaran Nair found it necessary to resign his posi-tion and leave the hall. Sir Sankaran Nair is one of the

good account.

The real tragedy of the moment is animating his whole movement, Mr. Gandhi himself should be destitute of any vestige of political sagacity or constructive purpose. He still re-mains the central figure in the Indian scene; but many who a year ago would have staked their reputation on his honesty and high purpose have now turned skeptical, or, at least, puzzled: Mr. Gandhi is, in truth, a

Last week in the Down-Stairs Store at Wanamaker's, we had a sale of shoes at \$3.85.

These shoes were made by one of the best shoemakers in America, and the regular prices ranged from \$11 to \$20 a pair.

The maker had some floor stock, a few small cancelled orders, and a group of samples.

That is why the sale happened. But-

The point is this: The Wanamaker Store is continually finding unusual opportunities of many kinds-

And offering good, wantable, guaranteed merchandise at worth-while savings.

Makers of good merchandise seek this Down-Stairs . Store as an outlet for their surplus stocks-

Because they know that the Wanamaker standard covers the Down-Stairs Store as well as the Upstairs Store.

It is the old, old story of confidence.

PUBLIC AWAKENING TO SCHOOL NEEDS

Dr. Payson Smith Says Educators at Chicago Conference Felt New Impetus

Greater faith of the American people in their public schools and their unliterable intent to stand back of them, is confirmed by largely increased chool apprepriations and a new earn-stness in school affairs, are the outlanding convictions brought by school ner from the recent Chicago conference of the department of superincedence of the National Education association, according to Dr. Payson mith. Commissioner of Education for fasticular to the convention in his opinion, more than anything that was said or done, and the power of it must be infused no school work all over the country turing the coming year.

With the criticism that has been used at the schools, the magnifying fastinesses, the minimizing of chievement, the ridicule of effort, the contain the ridicule of effort, the contain the ridicule of effort, the contain the school man to leaf discouraged.

The School man to leaf discouraged.

The School man to teal discouraged.

The School man to the discouraged of the school man to the discouraged.

The Smith says, with the people ridently persuaded that conditions are no serious they must be given subtantial attention, there is a heartening among the educators who for cars have realized the situation but ave been as those crying in the diderness.

Development Is Ahead

educators in the backing of the public

educators in the backing of the public was felt.

In the course of a noteworthy address Professor Seligman of Columbia University said that in America, the richest country in the world, there was no doubt but that the people could financially support the one undertaking more necessary than any other to the welfare of the individual and the nation. He pointed out the difficulty that lies, not so much in the availability of funds as in the adoption of some method of taxation. One meeting was given over entirely to the subject of financing the schools. The significance of this was the appreciation that the vast sums of money now involved in public education must be administered with as keen appreciation of values as that which obtained in any business organizations.

Next to the question of finance, the topics making the most general appeal were those relating to the more efficient treatment of the neglected fields of education, the needs of rural children and the necessity of more complete means of dealing with rural education. The subject of illiteracy received special attention.

Draft Was Object Lesson

Draft Was Object Lesson

Draft Was Object Lesson

To the one who read as he ranger. The continued, the things the conference said were not of such consequence as the fact that they were said, for it meant an intent to take the gift of a proper and suitable education to every child in the land whether he lived in cities where wealth is congregated, in sparsely populated farming regions, in mountain fastnesses, in wooded wilds, or on the islands of the sea. What that means could be easily estimated by thinking back to the first days of the draft when the astounding news went forth that one out of four of these American young men was illiterate. It was then that America woke from her complacent dream of the little red schoolhouse and began to bestir herself. Now reversing the facts, it would be seen that the slogan, facts, it would be seen that the slogan, "No illiteracy in 1930," adopted at the conference, was in a fair way to being realized.

the says America's public schools are efficient today than they have been. The superintendents are rently highly appreciative of the set problems but accept them as allenge. From every section of country, he said, the reports indictant we are entering upon a period pid and great educational development of public education in the arrow of public education in the arrow of Superintendence contents of Superintendence contents of the inability of normal and training schools to meet the demands the says and so contents. It was obvious at the convention that the problem of the inadequate supply of trained teachers was still of primary importance. At the outbreak of the war, it was well known that there were thousands of persons occupying teaching positions who themselves had less than a secondary school education. In many cases where high standards of education and training had prevailed the teaching profession has become diluted because of the inability of normal and training schools to meet the demands that the problem of the inadequate supply of trained teachers was still of primary importance. At the outbreak of the war, it was well known that there were thousands of persons occupying teaching positions who themselves had less than a secondary school education. In many cases in the convention that the problem of the inadequate supply of trained teachers was still of primary importance. At the outbreak of the war, it was convention.

order asking for an opinion on the constitutionality of the federal act is before the Senate for action, the motion to reconsider was defeated.

Investigation into conditions affecting the distribution and issue of meat products by the State Department of Agriculture would be made under a resolve reported to the Senate. The recommendation of the reco

resolve is the result of the recom-mendation of the Commission on the Necessaries of Life and would in-clude prices and the question as to what extent prices might be lowered by competent legislation.

Although the House was chiefly con-

cerned with the debate on the tax himit of the city of Boston, a few committee reports were received. A bill providing an increase in the salary of the Attorney-General from \$8000 a year to \$10,000 was given reference to the next annual session, and a favor-able report was given a measure providing that appeal from the decisions of the Registrar of Motor Vehicles shall not operate to delay the validity of the rulings.

Townsmen Agree to Put Up Wires

New Hampshire Has Cooperative Movement to Get Light Service

NEWPORT, N. H., March 10 (Special Correspondence) - The cooperative idea applied to a new field is seen in the action of the inhabitants of several country towns in Sullivan county who have contracted with the Newport Electric Light Company for the extension of its service to those communities. These towns, beginning with East Unity and Croydon and fol-lowed by Washington and North Charlestown, has agreed to enlist their residents in performing the labor necessary for the extension of service to their respective towns. The company, being relieved of the labor cost, will furnish the material and supervision for building the lines and then sell the many geographical and technical service at rates to be adjusted by the branches of the various government State Public Service Commission.

Without the cooperative plan, the public utility lacked capital to extend its lines but with cooperation, the work can be done and the people expect to derive a handsome return on their labor in the way of low fees for lumber interests in regard to every materials. INVALUABLE TO INDUSTRY

Information Service Receives Reports From All Parts of World and Department Maintains Clipping Bureau for Use of the Trade

products are to be made more easily accessible to American lumber interests, who take advantage of the information service inaugurated by the reorganized lumber division of the Bureau of Foreign and Domestic Commerce, to promote larger exports in that field.

"The Department of Commerce has realized that it can be of great service to thousands of lumber manufacturers in this country by securing information regarding foreign lumber-market conditions and disseminating it in a concise form, comprehensible to our lumber industry," said Leonard B. Gary, New England office manager, in

explaining the object of the service.
"The lumber division," he continued. "offers its greatest assistance to the industry in its information service. Lumber reports are received at regular intervals from all the Department of Commerce representatives abroad namely, commercial attaches, trade commissioners, and special agents. stationed in the principal capitals and trade centers of the world, and also several hundred United States conditions abroad.

Through the department's own clipping service it receives articles of in-terest to the lumber trade in general, collected from every part of the world. Moreover, it is cooperating very closely with other government organizations, such as the forest service and the departments. In this way the division

mation desired from the Government's sites are being considered.

Existing markets abroad for lumber foreign representatives, and in turn, oducts are to be made more easily upon receipt of such information, to interpret it in a way satisfactory to

"Publication of a lumber export directory is also proposed. Such a book would be a great value both to foreign buyers and to the lumber in probably contain information concerning the organization of the various export companies, mills, species cut, capacity, timber holdings, ports of loading, trade-marks, etc.

"In cases where proposed foreign laws and regulations threaten to discriminate against American lumber the Lumber Division makes a special point of taking the matter up with our representatives abroad. The di-vision has already been successful in one case of this kind."

BUILDING PROGRAM FOR YALE DISCUSSED

NEW HAVEN, Conn., March 11-James Gamble Rogers of New York, consulting architect of Yale University, conferred here yesterday with consular officials in every foreign country. Furthermore, the lumber division receives every important lumber publication and has on file a mass of material relating to lumber well of Chicago is chairman of the well of Chicago is chairman of the committee.

No statement was given out, but Mr. Rogers, in an interview tonight, said that recent published accounts of Yale's building plans were "grossly exaggerated." Although most of the buildings now planned will be in gothic architecture, Mr. Rogers said

A SALE OF Silk Crepes

Crepe de Chine Crepe Faille Crepe Romaine

Canton Crepe Mat Crepe Moroccan Crepe

Monday, March 13, and the following days.

THE wanted fabrics in the fashionable colors at prices about 25 per cent less than those now prevailing on goods of equal quality.

From a manufacturer who preferred to stimulate business by turning some of his fine silks into cash at the sacrifice of his profits.

We are familiar with the beauty and wearing qualities of these goods, for these numbers have all been in our regular stock at much higher prices—for instance, those now offered at \$3.75 have been sold at not less than \$5.00 and \$5.50 a vard.

We believe we have rarely offered such an "occasion" in the fashionable fabrics of the season at the very moment when they are most wanted.

Crepe de Chine \$3.50 Quality At \$2.55 Yard

Help to Stop Smuggling

"Establishment of a 'prohibition-fleet,' such as has just been assured by dispatches from Washington, stating that Andrew W. Mellon, Scoretary of the United States Treasury, has showed a quick and subtile response to the changing moods of the lines about the maid who is fair Ireland—trodden, undaunted, tender, confident. This was the most largely schemed of the three, and full of exciting moments. It finally rose to a blood-stirring, martial fury of drums and fifes.

Mr. Monteav and his orchestra acquitted themselves with impeccable brilliance in this difficult score. Mr. McCormack was, of course, 'ideal for the songs, and he sang them eloquently and stirringly. His soft touch of brogue lent further illusion. He seemed the more fully at home after the less congenial and not too inspired airs of Bach. The "Haffner" Serenade is an instance of Mozart's Serenade is an instance of Moza "Establishment of a prohibition feet, such as has just been assured by dispatches from Washington, stating that Asstraw W. Mrs. Corvin listed her liabilities at \$2441 and her assets at nothing. The largest, item of her liabilities was \$2260 owed the Cosmopolitan Trust Company, as the assessment on 22 shares of stock.

WARNER SUIT ISSUE OF WIDE INTEREST

Public Largely Concerned on

adequately proportioned orchestra.

On Monday evening, March 13, in the same hall the fourth concert of the "extra" series of the Boston Sympointed. The various charges made by the Lieutenant-Governor, were recounted in detail and denied specifi cally both by John L. Hall of counsel for the plaintiff and by Mr. Warner himself on the witness stand late yesterday afternoon

Mr. Warner admits that he introduced Mr. Hathaway, in whose law offices he has had desk from for years, to William F. Garcelon, counsel for the Arkwright Club and for the Fall River Manufacturers Association some three years ago when he was Speaker but he denies that he knew that Mr. Hathaway was engaged by Mr. Gar-celon to appear for the cotton manu-facturers before the legislative com-mittee on education and speak for a bill relating to the hours of labor in their mills. Mr. Warner declares that when he heard of this he asked Benjamin Loring Young, now Speaker of the House and then Republican floor leader, to go before the committee on education and oppose the bill and secure its defeat which he did.

Mr. Warner also charged the Lieutenant Governor with circulating charges similar to those which he made upon the stump and in the newspapers by means of circular letters through many automobile agencies and garages in Massachusetts. A copy of such a circular letter was read and

selves to lose sight of the distinction between real guidance and mere "jobgetting," he declared. To achieve the end of the right purported to be.

Attorney Hall, who is of the Boston law firm of Choate, Hall & Stewart, declared that Mr. Fuller, realizing that Mr. Warner was his most formidable rival for the Republican nomination of lieutenant-governor, determined to destroy him politically and that he seized upon Mr. Hathaway's legislative activities as a plausible means of attacking Mr.

Merchanic Manager of the distinction between real guidance and mere "jobgetting," he declared. To achieve the end of the right place for the right person, there should be a real sympathy of understanding on the part of the counselor for the individual seeking the position.

Short reports on work were made by Miss Susan J. Ginn, director of vocational guidance in the Boston, determined to destroy him politically and that he seized upon Mr. Hathaway's legislative activities as a plausible means of attacking Mr.

PRINCE OF WALES

Tour of India Progresses Amid Popular Welcomes and Further Signs of Unrest

The Prince's departure was marked

The illuminations at night were ed on a truly majestic scale. On Friday night the Prince attended at the Maharaja's palace what was tersely described as a musical entertainment. It seems to have rivaled Bharatpur. The palace was a flaming mass of golden light, and the grounds were thronged with a crowd of 15,000, when at a given signal the place was plunged into the completest darkness, relieved only by the gigantic illuminated fleur de lys on Chamandi Hill. The musical entertainment, which was of the weird nature usually associated with Indian music, followed. On Monday the 23rd pt January, His Royal Highness returned to the capital, and that night amid enthusiastic scenes he started on his long journey On Friday night the Prince attended

Non-Cooperation in the form of the boycott of foreign goods has led to a curious result in Calcutta. The ma-jority of shopkeepers in the bazaars were terrorized or persuaded into destroying their stocks of foreign cloth, or in disposing of them at panic prices. This gave the Afghan, Pathan, and Afridi trader, always to be found at all the leading trade centers the opportunity for which he ters, the opportunity for which he craved. He bought up these stocks and set up in business himself. Here he sells foreign cloth, and being a strong and stalwart character pays not the slightest heed to the ex-postulations of the pickets. The lat-ter are flaccid Bengalees.

Bane of the Moderates

Too great a reliance on theory, and
an inability to get to grips with realities has unfortunately been the
bane of Moderate politicians in this
country, but there is a small minority
which sees the situation more clearly.

HUNGARY FAILS TO PASS BUDGET BUT TREASURY PAYS OFFICIALS against prohibition said they would not vote to overthrow it. There was

Situation Caused No Great Anxiety in Hungarian Government Circles, But There Is Considerable Criticism of Their Economic Policy

BUDAPEST, Feb. 14 (Special Correspondence)—The first day of the under discussion the financial advisers of the minister point out the unhappy example of German-Austria, and declare that nobody who is conscious of alcoholism, which caused poverty, misery and crime. He had not the slightest doubt that England, if she to bring about such a situation in Hungary.

In spite of the precarious conditions the example of America.

Mr. G. Bernard Shaw pointed out the part of the majority in order that the minority might be rescued from the bane of alcoholism, which caused poverty, misery and crime. He had not the slightest doubt that England, if she were not to be left behind in the race of nations, would have to follow the country might come to an exlex.

In spite of the precarious conditions the example of America.

Mr. G. Bernard Shaw pointed out in spite of the precarious conditions through which both trade and industry are struggling, the Minister of Finance to the country had a lawfully-voted budget. At the present time, however, neither the Present time, however as a public morality and toutilities the civilized state put certain thi

for two years.

So far, many an important speech
has been delivered against the economic policy of the Government. The
unwarranted favoritism shown toward

French Company to Help Rebuilding The great interest evinced by some French groups in the Hungarian eco-nomic situation is spoken of here in unwarranted favoritism shown toward sundry enterprises by allowances of import and export licenses was sharply criticized. Continual curtailment from which the foreign trade is suffering, and difficulties of transport, have put the whole export trade in a very critical situation. The flour export practically came to a complete standstill. At one particular time, the Government forbade the export of stocks already sold, because of the revision of the export premium, which took several weeks to settle.

Heavy Import Taxes Assessed

country, and would at the same time grant to fee owners of house property sinking loans in French francs. The company was also prepared to build houses for renting in Budapest against an allowance of only 10 per cent. The company was also agree to buy the required machinery and materials in Hungary, and to take over the Hungary, and to take over the Hungarian industry have come almost to a complete standstill. Never did the lack of money affect conditions in a more marked manner than on the occasion of the last Christmas market. The Minister of Finance, however, is not inclined to adopt the proposal of several economists, asking for an inflation of the currency. The Need Institution, it is true, has promised to pawn the values, quoted on the Budapest Exchange, to an amount of 30 per cent of the quotation, but it seems determinedly opposed to go further along this line.

The currency of the shares would naturally rise as a result of the inflation; on the other hand, however, ne has to take into consideration hat this would cause a gengral increase in the cost of living, and this point of view weighs heavily, against

BRITISH AUDIENCES HEAR 'DRY' HISTORY

Fabian Meeting Example of Effort of Prohibitionists American Speaks

ALLAHABAD, Jan. 26 (Special correspondence) — From Madras the Prince proceeded for a day's visit to Bangalore which is an important center in South India for the army and the Royal Air Force. Here on the testimony of reliable eye-witnesses enormous crowds gathered to meet the royal visitor and gave him a most enthusiastic reception.

The Prince's departure was marked by as enthusiastic scenes as his arrival when he left for the important to than anybody else for securing a conference, and peace, but he and one more than anybody else for securing a conference, and peace, but he and others had failed," for which Mr. Gandhi alone was responsible, for he had banged the door.

Sir William Vincent emphasized that the Government's policy had been to let the non-cooperation movement alone, so long as it remained peaceful and constitutional. Every effort had been more than anybody else for securing to conference, and peace, but he and others had failed," for which Mr. Gandhi alone was responsible, for he had banged the door.

Sir William Vincent emphasized that the Government's policy had been to let the non-cooperation movement alone, so long as it remained peaceful and constitutional. Every effort had been more than anybody else for securing to conference, and peace, but he and others had failed," for which Mr. Gandhi alone was responsible, for he had banged the door.

Sir William Vincent emphasized that the Government's policy had been to let the non-cooperation movement alone, so long as it remained peaceful and constitutional. Every effort had been of the audience. The chairman, Dr. Lawson Dodd, remarked that the size and representative character of the gathering was proof of the important the followers had the form of the suddence of the subject and the growing interest in it.

to welcome the prince to do so? Who boycotts and intimidates those who venture to serve the Crown or wish to buy or sell foreign piece goods? Who prevents reasonable respect being shown to the dead?

Mrs. Butler explained that she took to the platform because of her desire that British people should know the facts of prohibition and not be misled by misrepresentations. "If," she said, shown to the dead? "English people come to believe that the American nation is dominated by a narrow-minded, intolerant minority group, that might have serious results when we come to adjust matters of mutual concern."

She traced the growth of the prohibition movement, and added that work-ers for other reforms had been greatly heartened by the prohibition It had often seemed, she said, that although the American people were a democracy, there were powerful forces at work that constantly thwarted the very purposes for which the country had been founded. The prohibition victory had shown that it was possible for the Nation, by courage and per-sistence, to make its will prevail over selfish and vicious interests, and now that liquor was out of the way social reformers would be able to devote their time and energy to other urgent

Mrs. Butler's address was followed by a volley of questions, but for the most part these showed open-mindededness and a genuine desire for fur ther information

Agreed With Socialism

Sir Arthur Newsholme, who also spoke, said that, having lived for the greater part of two years in America, traveling through the whole of the United States, lecturing in the principal cities, and moving in various circles, he had come to the conclusion that so far nothing but good had resulted from prohibition, and that it would be an increasing blessing. He had talked with many university people and others of good social standing, and, without a single exception, even those who had voted no prospect of the policy being reversed. He had been astonished to hear at a Fabian meeting the com plaint that prohibition was an inter-ference with individual liberty, for the essence of Socialism was govern-ment of the minority by the ma-

jority.
Prohibition was really an altruistic movement on the part of the

LENINE DISCARDS **COMMUNIST IDEAS**

Greater Part of Russian People Said to Approve His Conduct

MOSCOW, Feb. 14 (Special Correpondence)—It has been shown in the iscussion at the ninth session of the scussion at the ninth session of the scussion at the ninth session of the scussion at the greater part of the country proves the action of the Lenine roup in sacrificing many of the Communist tenets, with a view to an 'economical reconstruction of Russia. The position of the extremists, which is onsiderable within the party, is ractically nil compared with that of the population, which longs only for eace and economical improvement. From the successful point of view of the new policy of the Moscow Government, the following resolution, oted with unanimity regarding the amous Tcheka, is characteristic: The Congress considers that the concolldation of the Soviet power, as such at home as abroad, enables the urtailment of the scope of action of the extraordinary commission for the truggle against the counter revolution, by reduction of its control to the aringements of Sovietic laws. In his spirit, the Congress confers to the residents of the Central Executive committee the care of revising, with

presidents of the Central Executive Committee the care of revising, with the shortest delay possible, the statutes of the extraordinary commission and its reorganization upon the lines of its sbridged competence."

Another resolution invites the Commissioner of Justice to take the necessary steps in order that the popular tribunals controling free trade do not limit their activity. Lastly, the resolution enlarges upon the necessity of proceeding to a political education of the masses, governed by a sense of respect to the laws of the republic.

In the very complicated system of

In the very complicated system of the government of the Soviets, the

stinct works like a sixth sense, was degree. characteristically quick-sighted when He and the Coalition will be helped he wanted to have a dissolution in Jan- by the weakness and ineffectiveness of

might be hitches and, not impossibly, disappointment. It was better, therefore, to ask for a vote of confidence on account rather than to await results which might not come up to expectation. Moreover, with a democracy, a prospectus is a better spell-binder than a balance sheet.

The Tory mutiny and the fresh international complication arising out

The Tory mutiny and the fresh in-ternational complication arising out of the fall of M. Briand compelled Mr. Lloyd George to put off the dis-solution awhile, and now that the sky, both at home and abroad, is a good deal more threatening, and it is clear that the Government does not intend to go the whole hog with the cuts in expenditure recommended by the

Premier Without Rival

The Tories have realized now that they cannot purge the Premier of his democratic instincts and leanings; and if they could find a leader of any prestige and courage they, or at least the greater part of them, would break away. Nor are the Coalition Liberals very happy in the partnership, for they deeply resent the Tory occupation, by virtue of the pact, of a number of seats which are traditionally Liberal, and their inability to secure a fresh and fair allocation.

The Coalition, in fact, is only held together by the fact that Mr. Lloyd George and determination to win which have made him what he is, and he will be hard hit if defeat comes. Yet it would not be without its compensation. He has now been continuously in ministerial office for over 16 years, six as Prime Minister. Thanks to Mr. Carnegie, he is not without sufficient means for retirement; and retirement would not only give him rest but leisure for things he has long wanted to do, some writing, for example. The book he could write about the war and the peacemaking would surely be among the best sellers.

Labor Is Divided

Little light is thrown upon the quesafter as possible, the third Parliament of King George will come to an end.

The sooner the better, so far as the government is concerned, for its position grows more difficult every day.

Tory Malcontents

There can be no question that the Prime Minister, whose political instinct works like a sixth sense, was

by the weakness and ineffectiveness of that time the sky was a good deal clearer than it is today. Everything seemed going well with the Irish peace; there was the promise of a genuine attempt to straighten out the economic tangle of Europe and there were vague but comforting hopes that the Geddes report would be made operative in large curtailment of public expenditure and a sensible lightening of the heavy burden of taxation.

In the realization of these things there might be hitches and, not impossibly, disappointment. It was better, there-

Attitude of Liberals

As for the Independent Liberals, otherwise the "Wee Frees," they are in a parious way, without any real program beyond personal hostility to Mr. Lloyd George. One might almost say without a leader too, for Mr. As-quith's leadership has been of a fitful solution awhile, and now that the sky, both at home and abroad, is a good deal more threatening, and it is clear that the Government does not intend to go the whole hog with the cute in expenditure recommended by the Goddes committee, the prospects of the Coalition at the polls looks less promising. To be sure, the Tory malcontents have, with a few exceptions, come back to heel, and the responsible Conservative leaders have declared that the maintenance of the Coalition is, for the present, essential to the national interest. But the Conservatives—they have now officially returned to that designation, "Unionist" having become an appellation of no meaning—are still very sullen partners in the Coalition, and very resentful of the necessity of Mr. Lloyd George's premiership.

The Tories have realized now that

JAPANESE UMBRELLA POP MAKER. CUE TOURIST JOYS ARE SUBJECT OF INTERNATIONAL EXPOSITION The Travel Club of America Will Show New York

Ways and Means of Visiting Far-Away Lands

and of Seeing America Too

New York, March 6 (Special) N opening its first international exposition on March 25 in the Grand Central Palace, New York City. Travel Club of America is undertaking to depict travel in its real meaning of a joyous pilgrimage, in

which troublesome railway connec-tions, anxious choosing of hotels and fruitless asking of questions have no rightful part. Incidentally the exposigreatest. They will undoubtedly win seats at the general election, but the time when they will be strong enough to form a Labor Government is not yet. countries with their arts and crafts and to realize their own part in the affairs of the world.

Charts, motion pictures and printed information of all kinds will illustrate travel routes, making the minarets of Islam, the exotic gardens of Spain, the white cities of Algeria and antique charm of India seem acessible to the American, and creating new interest in the scenes of his own

country.

The United States Bureau of National Parks and the United States Department of Commerce will have ex-Tzecho-Slovakia, Denmark, Finland, France, Italy, the Philippines and Monte Carlo there will be official government displays, Eskimos, South Sea and Oriental silk spinners will in person show how they pursue their native industries.

Trips in Packages The would-be traveler who seeks impressions and suggestions for trips to think out for himself will find much

Custom Made Department Skirts from \$5.00 up Suits from \$25.00 up

of interest in the various exhibitions. While the matter-of-fact individual, who has a definite amount to use for a vacation but does not want to plan its expenditures, may secure "trips in say on the most instructive feature packages," and number of them at \$50, of the Travel Show from an educaor \$500, or \$5000, each package containing exact information as to transportation, points to be visited, hotels and extras, all figured out within the Europe which will be illustrated at sum named

Under the direction of the executive committee, Maurice Francis Egan, former United States Minister to Denmark; Henry Collins Walsh, president of the Travel Club of America, and Woodruff Sutton, director of the Travel Show, there will be a program each day during the week of the duration of the show.

American travel will be emphasized in moving pictures and talks on the next day. European Travel Day will be celebrated on March 28, and Oriental Travel Day on March 29. The last three days will be given over especially to information concerning travel routes by ocean, by American inland waterways and railroads, and

Prizes for School Essays

Among the features in connection with the exposition is an essay contest for teachers and school children. To the teacher in New York City or the suburbs who writes the best essay on the most instructive feature the show.

Week-end trips to any resort within 100 miles of New York, including transportation and hotel expenses for themselves and the six older persons whom they choose to accompany them, will be awarded to the three boys and three girls from the primary, grammar and high schools who write of the duration of the show.

March 25 will be Government Day.

the six best essays on topics connected with the Travel Show.

Men That Favor "Good Sense"

In every community you will find men who are the natural leaders of thought, solid citizens, deliberate in judgment, firm in conviction. These are the men who wear the Coward "Good Sense" Shoe. In the "Good Sense" Shoe their character is reflected; for it expresses dignity, quality, comfort. And in keeping with what you expect of its wearers, "Good Sense" is an economy shoe in the true sense of the word; it wears long and looks well.

EGYPTIAN SUGAR RULE CONTINUED

Prohibition of Imports Extended -Market Riots Non-Political

ALEXANDRIA, Egypt, Feb. 4 (Special Correspondence)-Contrary to the official announcement made in November last, the control of sugar prices by the Egyptian Government is not to cease at once. Owing, it is stated in a communiqué issued by the Supplies Department, to the consumption falling short of the estimates there appears to be a considerable surplus of sugar which was produced under special terms with the Sugar Company, holding the mo-nopoly for Egypt, and the the cultivators.

In order to permit the company to dispose of this costly sugar without loss, the prohibition of sugar imports has been temporarily extended, it has been found possible, on the other hand, to reduce very consid-

erably the price of sugar.

In spite of this fact, the position appears to be far from satisfactory. Further, the present price is still about double that at which sugar could be imported, and thus Egypt is paying dearly to foster its sugar industry.

The trouble at the markets, which is proclaimed by local politicians as evidence of the success of the boycott of British institutions, is in reality non-political. Some 20 years ago a British company, under the name of The Egyptian Markets Ltd., obtained a concession to erect suitable market places at the chief country centers and to control in their way the local live stock trade. As agents for the Government the company has rendered valuable services in securing many improvements in the organization and control of these fairs. No sales of live stock on market days are permitted outside the enclosed mar-ket, and all animals entering it are imposed with a light tax of a few

Although the fellah dislikes any regulation which costs him money, he markets have become well established, and up till recently few thought of evading their control. The political propagandist was not slow to play upon the feelings of the fellah and had little difficulty in stirring up the old resentment against having to pay a fee, however small, for exhibitng his cattle for sale

The result has been that in one or two markets the native police had to inflict a few casualties before those holding an illegal market would disperse. At other places the markets have been closed, and this will probably be the best measure to take without his weekly "sug" the fellah feels lost. Certainly there is no reason to believe that this unrest will be anything but short lived.

New Electoral Law Expected BEIRUT, Syria, Feb. 6 (Special Correspondence)—According to Al-Balag the project of the electoral law for the project of the electoral law for the Grand Lebanon is now under consideration by the High Commissariat. Immediately after the census, the electoral law will come into force. The elections will be conducted by the system of the vote of the second degree. Every 30,000 citizens will be entitled to a deputy.

BOSTON TAX RATE BILL IS ADVANCED

House Passes to Third Reading the Measure Which Fixes a Limit of \$12.25

In a debate marked by personalities and politics, the question of the tax limit of the City of Boston roused the House yesterday, filled every desk on the floor and attracted many to the galleries. Representative Martin Lomasney led the fight against taking off the "lid" from the tax limit of Boston, and the bill fixing a limit of \$12.25 was finally ordered to z third reading, and the Shattuck amendment to take off the tax limit for one year was rejected.

Representative Martin Hays took up the cudgel for the Shattuck mendment after Representative Davis B. Keniston had opened the debate by urging passage of the limit bill. He declared that Mayor Curley is moving for honest government and should be allowed "to have his way for once." He asserted that he is willing to trust the Mayor to do well because he is convinced that that is Mr. Curley's intention.

Rep. Elljah Adlow rose in opposition, declaring that the finances of
Boston are chaotic and that it would
be unsafe to lift the lid. The Finance
Commission says \$12 is enough and
the committee has allowed \$12.25. If
Mr. Curley intends to keep within this
limit he would not ask to have it
removed. The Republican administration is "doing better by" the present Mayor than it did by his predecessor in office.

presentative George H. Newhall ed out that the tax limit bill is or one year only, and Representative ames Brown urged the House to stand y its policy of 40 years. Representative Henry Shattuck defended his mendment, pointing out that the tax mits were taken of all cities save poston in 1913.

Mr. Lomasney then launched a personal attack at Mr. Hays, criticising his record and other members of the House. Speaker Young rapped the Representative to order and objected to the injection of personalities. Mr. comasney reiterated his plea of yeserday against taking off the curbrom the city and Representative John W. McCormack champloned the mendment, declaring that the finance commission, not the Mayor, is the leal motivating force in Boston mances. Recriminations passed back and forth, intermingled with arguments for and against the limitation of Boston's tax.

ments for and against the limitation of Boston's tax.

On the amendment of Representative Benjamin Lane to cut the limit to \$12 the vote was almost manimous. The Shattuck amendment "lifting the lid" was equally definite as was the vote on passage of the bill to a third reading.

Political Small Talk By RUSH JONES

the Eleventh Congressional dised views on this problem in the

material for argument for renomination by the Republicans and reelection by his constituents without regard to party.

In reviewing Ma. Tinkham's work in Congress, it must not be forgotten that he was not an advocate of national prohibition. That fact he has never sought to hide nor to gloss over. Were the Logislature to reapportion his district along with the other Congressional districts in Massachusetts, things might be different with Mr. Tinkham as well as with certain others of this state's delegation.

epresentation is a problem which Republican leaders in Massachus seem reluctant to approach and pple. Perhaps, and this is not unadvisedly, the state leaders in workaday harness are awaiting ice—orders might be the more appriate but less polite word—from whington

Party commands from Washington are handed out more gingerly these days than used to be the case. The national party leaders, both Democratic and Republican, realize that the people are showing less and less inclination to take directions and to obey just because political chiefs and shelks give the nod. This condition obtains in Massachusetts as elsewhere.

Many of the members of the House and Senate are inclined to pass, along the bill which would allow Boston's wards to elect 26 Councilmenthese legislative representatives of the people think, or say they think, at the voters of Boston should attle for themselves whether they refer a small council elected at large a return to the old "log-rolling" or adding form of council.

ortion of them, believe that the cortion of them, believe that the concilmen bill when it appears he ballot next fall as a refuum, if the measure finally a and accurate the Governor's ture. In other words, they pass assomatisity.

British Labor Members of Parliament Want Immediate Economic Recovery

LONDON, Feb. 17 (Special Correspondence)—The Labor Party has every reason to feel satisfied with he result of the House of Commons debate on the address, Mr. J. R. Clynes being in a particularly happy mood, if one can be said to be happy mood, if one can be said to be happy in speaking upon unemployment. Neither the leader of the party in the House nor any of his followers have swallowed the bait hung before them by Mr. Winston Churchill and Lord Birkenread by defending the party from the attacks of the Coalition chiefs. The Labor Party may lack the experience of the two historic parties, but it has sufficient political sagacity to know that in the field of politics, as in the field of sport, attack is the best defense.

The point of attack has been failure of the Government to deal effectively with the problem of unemployment. Almost without exception Labor's spokesmen have concentrated upon the question of the workless, referring to the foreign policy only in so far as that policy aggravated or conduced unemployment. It is true that Mr. Clynes referred to the Washington Conference and to the European situation, but the real sting was reserved for the reasoned criticism of the Government's inability

was reserved for the reasoned criti-cism of the Government's inability to produce a constructive scheme that would enable men to devote their en-ergies to productive work in contra-distinction to receiving Government

In regard to the Washington Con-erence, Mr. Clynes said the delegates and failed lamentably to rise to the ask for which they had been called ogether. Limitation of armaments, the insisted, would not guarantee he insisted, would not guarantee peace; for there was always a strong desire on the part of those possessing arms to see how they would work. Labor stood for complete disarmament and world reorganization, the prerequisites to world peace. It opposed military alliances with any single nation. France's attitude and anxiety were understood and appreciated by the Labor Party; but the latter's security rested, not upon alliance with England or any other nation or combination of nations, but upon an alliance of peace with all nations in an

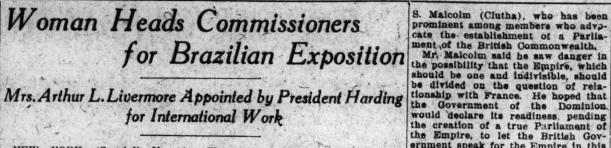

bination of nations, but upon an alliance of peace with all nations in an association of peoples.

It speaks well for the Labor Party that the only effective reply to its criticism centered around a misapprehension of what was said. Mr. Clynes, in the course of his speech said in effect that the problem of unemployment was so acute the concern employment was so acute the concern of the Labor members so real and dis-interested, that they would rather see the government handling the question than take office themselves. Mr. Lloyd George, misconstruing this to mean that Labor was not anxious to be called upon to clear up the muddle, liayfully taunted the Labor Party on his attitude, dismissing the subject this attitude, dismissing the subject by saying that in consequence of La-bor's admitted unwillingness to change places with the Government its

member for Southwark, who admitted that the cry for reduction in cost of production was economically sound, and if employment was to be increased by enlarged demand for goods, the goods must be more cheaply produced. In sharp contrast to Mr. Naylor's speech was that of Mr. Lambert, who attributed much of the present trade depression to governmental interference with industry, asserting that the

workers' interests were injured, not served, by government expenditure.

Mr. Naylor, on the other hand, claimed that the great difference between the present government and a Labor government was the former's unwillingness to devote revenue to the building and starting of productive work that would create employment for willing workers, an unwillingness due to a desire to do nothing that would hurt the susceptibilities of their friends, while a Labor government would have no such scruples in starting work that would compete with private industry. Precisely around this point the forthcoming elections for the London County Council will be held. Inabor's program includes the municipalization of milk, meat and coal, services, and extension of transport operations by inclusion of underground railways and other means of transit.

Mrs. Arthur L. Livermore Appointed by President Harding

the independence centenary exposi-tion of the South American republic has greater future significance than the appointment of a woman as one of the six American commissioners. If Labor entertains apprehension, it President Harding appointed to the

The Women's Displays All of the women's displays are to be under the direction of Mrs. Liver-

"I have been astonished at the num ber of young women who are equipped to assist the commission," said Mrs. Livermore, speaking of the personnel in the administrative part of the work. Both at our headquarters in the Interior Building in Washington and here in New York numbers of young women have applied to serve as sec-retaries to the commission. Not only are these young women trained to speak Spanish and Portuguese, which is a necessary part of their equipment, but they are familiar with the history and geography of the United States of Brazil. It is the hope of the com-mission that such knowledge may be increased throughout our country during the months intervening between now and the exposition and that women's organizations generally throughout the country will have made an effort to spread information concerning the great republic to the south of us, a republic with which our own must of necessity become more closely allied.

JERUSALEM, Feb. 17 (Special Correspondence)—A few weeks ago, while passing through Palestine on his way to Iraq and India, where he is taking charge of the work on behalf of the Keren Hayesod, Dr. A. Benison was received by Sir Herbert Samuel, the High Commissioner for Palestine. Following the interview Sir Herbert Samuel addressed a letter to Dr. Benison, in the course of which he wrote: "I desire to express my best wishes for the full success of your mission in

Iraq and India. "The admission of Jewish immigrants into Palestine must depend upon the extent of the country's economic development; this in turn Speaking of the plans for the cen-depends upon the funds that are forth-enary exposition which is to open coming for the purpose. Not less important is the cultural aspect of the Jewish National Home in Palestine, and for this also it is essential that adequate resources should be supplied. If the Jewish population of the world is ready to furnish the financial means, I am convinced that the energy and enthusiasm of the Jewthe energy and enthusiasm of the Jew-ish population of Palestine, and of those who will be added to them from other countries, will succeed in cre-ating a Palestine of which we shall all be proud, in which all sections of the population will prosper, and in which Judaism will be free again to display those great qualities which made its greatness in ancient days."

Came to Britain

LONDON, Feb. 17 (Special Correspondence) To mark the headquarters in Great Britain of the American Army during the World War, a white marble tablet, surmounted by a bronze scroll bearing the arms of the United States, designed by Sir E. Luytens, was unveiled, under the patronage of the American Ambassador, on Lincoln's birthday, Gen. Lord Horne in the hall of what is now the Belgravia Hotel, opposite Victoria Station:
"There has never been a time," Mr.

George Harvey said, "when there was a clearer, more specific, definite sympathy between the two branches that constitute our common race than has followed the Washington Conference. That Conference and this tablet symbolize the unity of a great race in an endeavor to save our respective countries and safeguard our common liberties against a common foe. It is a matter of pride and gratification to every American present that a great British soldier should honor us by unvailing this tablet, which we all trust will remain forever as an evidence of the continuing fraternity of these two branches of our one race.' Lord Horne said he welcomed the

opportunity of expressing the senti-IMPROVED STATE

ments of sympathy and good will which
existed between the two great nations,
and the respect and affection that all Necessity for Energetic Action Is soldiers felt for their comrades in arms. After sketching the great exploits and progress of the American Army in Europe, General Horne paid mage to the American Navy. Selma Lagerlöf, Swedish Academician, Whose Latest Book Recently Reached America

BY FLORENCE MILNER WARDED the great gold medal by the Swedish Academy, created Doctor of Letters by the Univer-of Upsala, the first woman to be reded the \$40,000 Nobel prize for ature, elected five years later to bership in the Swedish Academy, known and widely read in the English, and German-speak-countries translated begide into-French, English, and German-speaking countries, translated beside into Russian, Spanish, Danfsh, Finnish, Dutch, Italian, Icelandic, and more limitedly into Arabic, Hebraic, Armenian, and Japanese—such are the high honors already won by Selma Lagerlöf. It is interesting in this connection to note that Lagerlöf literally translated is laurel-leaf.

In common with other great writers,

In common with other great writers, Miss Lagerlöf was book silent during the war. That silence she has broken with "The Outcast" just reaching publication in America. One opens a new book by a writer of assured success, appreheading slightly a possible drop below the high standard already established. In "The Outcast" there will be no disappointment. Here is the same mastery of a great theme, the same individual style, and a deepened sympathy with all human experience. on with other great writers,

In the hands of a realist, the sugstion of an offense supposedly comtled by Sven Elversson against reclined standards might easily being repellent; the high idealism ich characterizes everything of this ther, saves the situation. The outst immediately stirs sympathy, rough hardships, social ostracism, depersonal sacrifices the reader. Iks by the side of Sven as though holy ground. The humility with ich the man accepts his lot, seeking complainingly, in entire self-abnetion, to bring happiness to others, Christ-like. Here, as in everything as Lagerlöf writes, we are susned through all circumstances, be by seemingly ever so tragic, by the derlying certainty that the spirit il soar triumphant at the end, that y matters of the spirit count in the ality.

Her Early Life

Selma Otilliana Louisa Lagerlöf was orn Nov. 20, 1858, at Mårbacka Ma-Sunne, in the province of Värm-Sweden. Her father was a rearmy officer while her mother descended from a long line of art-and distinguished clergymen. a used to sit at home with her ma used to sit at home with here its and the companionship of two-up people, thus cultivating here in the large and other qualities which er were to win for her such discretion. She browsed in the large ally library and was helped and couraged in her reading by both ents. The region of Marbacka bunded in romantic stories which the ard over and over from the the heard over and over from the many visitors, at the house. These she stored in her memory thus un-consciously gathering material for

ted at the home of an uncle in wholm. Of that visit she writes: I feel stupid and awkward with these mart city children for I talk the homely armiand dialect. But there are things idescribably wonderful in the old house here I stay. For one thing my uncle as a bookcase full of Sir-Walter Scott's ovels. Then there is the theater.

visits to the theater evidently r imagination. On her return e and her brothers and sisters sed a stage and produced plays nder Selma's management. She was roducer, stage manager, prompter nd very much the actor, often taking we or more parts herself. Again

From that day I long to write plays and not sit on a school bench and waste my time on composition and arithmetic. At 15 I had read all the poets and written

Her early ambition was to write ays and novels but at this age she me to feel that nothing was so de-rable as to write poetry. Of all she

hither and thither like a swarm of stray bees on a summer's day, not accumulating stories and bring them into a remarkable tapestry of Värm-knowing where they will find some together within the scope of the novelland. one who can gather them into a hive.
"The story that wanted to be told
had sprung up in Värmland, and you
may be sure that it circled over many mills and manors, over many personages and many homes of military officers in the heautiful province, peering through the windows and begging to be cared for. Finally the story came to the old place called Mårbacka."

She goes on to tell how the story, little by little was written in a fragmentary way, a chapter now, another story added at long intervals. In the

ette. In spite of the driving haste in which the work had to be done, she was the successful contestant. The editor of Idun offered to publish the

full romance as soon as it should be completed. Her loyal friend, Baroness Adlersparre, insisted that the author take a year's leave of absence for which she would furnish the funds, and finish the book. This she did and from that time her literary success was so assured that she never returned to teaching.

"Gösta Berling's Saga," "Jerusaspring of 1890 Idun offered a prize lem," and "The Emperor of Portu-for short novelettes of about 100 gallia" are counted Selma Lagerlöf's pages. Eight days before the date three greatest novels. In "Gösta to Selma Lagerlöf that she might to Selma Lagerlöf that she might take five chapters of the slowly around Marbacka Manor are woven translated into English are "Lilje-

dish Homestead," "In-visible Links," "The Girl From the Marsh Croft," the last three being col-lections of short stories. As a short

"Jerusalem," is in two parts. The scene of the first is Dalecarlia, Miss Lagerlöf's second home. The life of the peasant aristocracy here is bound up in attachment to the homestead. In "Jerusalem" this amotion in the "Jerusalem" this emotion is pitted against religion and love. The second part, called in Swedish "Jerusalem in the Holy Land," continues the ties for a school reader which should story to the departure of the Dalecarlians, through religious enthusiand historic tradition which is the asm, for Palestine and their later return to the beloved homestead.

"The Emperor of Portugallia" is the time, reveal the geographical wonders

story of a father's love and sacrifice of the country. The books were imfor his daughter. It has been called mediately popular in America, and

designs on wood by the author. The volume is bound in full marcon crushed levant morocco; the sides inlaid with four circular panels, two on each side, with representations from the fables in red, blue, green, brown, and white, surrounded by branches of purple grapes and leaves. The corners are inlaid, the linings are green watered silk with gilt edges.

Another beautiful example of early English binding is shown in the book, "Through a Looking-Glass," by C. L. Dodson, illustrated by John Tenniel. This dainty book is also bound in full dark green crushed levant morocco, both sides their with representations. both sides inlaid with representations of some of the characters mentioned in the story, in different colors, old rose, white, green, brown, slate blue,

MUSIC

Philadelphia Has a Session With Stravinsky

PHILADELPHIA, March 3 (Special Correspondence — Today the Philadel-phia Orchestra gave the first performance in America of Stravinsky's "Sacre du Printemps." Dr. Stokowski prefaced the playing with a little disarmament conference with the audience. He said that in Paris, where he first heard the work, there was a scenic background, maintained unchanged throughout the performance, in which a lonely mountain up-land was represented—fit setting for the primordial character of the sound emitted by the instruments. On the scene came figures representative of prehistoric mankind—the cave-dwelers, perchance-beings close to what Dr. Eastman would call "the soul of the soil." They take part in cere-monial rites and exercises invocative of the spirit of the spring, in its as-

pects of exuberance and fertility.

The first part has seven closely connected subdivisions, played without an intermission, and the second has six. At the start, the wood-winds take the lead, since the composer sought an effect relatively "dry" and "austere," which the strings, he thought, could not give him. There is a long-con-tinued and reiterated effect, in which the tympani considerably figure, to imitate the stamping on the ground of

In the second part, the continuing ritual observances, with strong tone-coloring from muted brasses, precede maid who is the sacrificial victim prepared and glorified in a manner distantly parallel to the custom of the Aztecs. There is a paroxysmal climax which finds the instruments in a con-stant alternation of odd tempi—fivesixteenths, three-sixteenths, two-six-

eenths, four-sixteenths. If one fails to envisage what all the rumpus, from first to last, is about, and does not realize that this is a primitive ceremony not unlike the shost-dance of an Indian tribe, or many a spring festival in various un-lettered portions of our planet, one is likely to find nothing in the sounds but hideous and blatant discord, though soon the rigid formalist or of the rhythmic scheme and the composer's consummate skill in the application of every variety of tonal pig-ment. The original force of the work is too salient to let it be dismissed with a caustic epigram or a few exco-

riating adjectives. The audience received the music with a cordiality unusual for an as-semblage of its maintained conservative character. Nor was the applause from the junior element and the progressives of the gallery merely. It came heartily from all parts of the

On the same program, Ernest Schelling was soloist, and he pre-sented his own "Fantastic Suite" for piano and orchestra which he played for the first time under the sway of Mengelberg, at the Concertgebouw in Amsterdam in October, 1907. Here Mr. Schelling ventures no heresies, such as led certain among us to celerities of the lighter vein or sustained cantabile of his Adagio, he revealed the facile technique, the feeling and the mentality that have come to be infallibly associated with the name of this excellent American

Wagner had the last majestic word -with excerpts from "Das Rhein-gold," "Siegfried," and "Goetterdaemmerung." The Siegfried episode was the Waldweben, which, in its euphonious bird-twitter and ecstatic wood-land suspiration, offered a striking contrast to the uneasy and even angry voices of Stravinsky's spring festival

Miss Marie Hall Plays Again in London

LONDON, Feb. 10 (Special)-Violinis to be hoped, be played very often in the future. The first and third movements are both full of rhythmic impetus and varied development, the second is quiet and beautiful. The piano part seemed occasionally too heavy for the violin. Mr. Gordon pacities of the two instruments.

"And that," she says, famous old Greek town of Asia Minor famous old Greek town of Asia Minor ated with its history. It was one of the seven cities which claimed to sometimes whisper to myself as I lies the site of ancient Colophon, to-nd in the shade of the trees and day the center of strongest archeoday the center of strongest archæowatch the evening sun's light flame day the center of strongest archæo-over plain and valley." Here is the logical interest since it has been chosen from all Greece for excavation. Just what will be discovered at Colophon is not yet known, of course, but for many years scholars have intimated that beneath the surface extraordinary relics of antiquity lie hidden, with ruins of ancient temples as great, perhaps, as the beautiful Tem-ple of Diana of the Ephesians, which yielded rich sculpture, architecture, coins and other art objects.

"The Goddess of Peace," published University, formerly American Minister to Greece, has received a cable-Prof. Edward Capps of Princeton ter to Greece, has received a cable-gram that the Greek Government has the age of 20 Selma took the granted a permit for the proposed titive examination for entrance excavation at Colophon. Professor Capps is chairman of the managing committee of the American School at

College in 1852. At the end of her three years here she was appointed to teach in the Grammar School for Girls at Landskrona, Province of Skane. She hoped now to find time for literary work. While she did some writing, she accomplished nothsome writing, she accomplished nothsome with the college of the results. The Fogg. Museum sent to Greece as its representative last summer Miss Hetty Goldman, Ph.D., a of importance. She wrote some summer Miss Hetty Goldman, Ph.D., a ets for Swedish magazines and former student at the Athenian School school told to her pupils many site of Halæ in Locris several years ago. The representative of the American School at Athens was its director, Dr. B. H. Hill. The two spent several months of last year searching for suitable sites, of sufficient importance for able sites, of sufficient importance for an undertaking of this magnitude. How this came to be written she has told most delightfully in "The Story of a Story:"

"Once there was a story that wanted to be told and sent out into the world.

. Many, through remarkable deeds and strange events had helped create it; others had added their straws to it by again and again repeating these.

They created pretty well over Old Greece and also visited a number of the islands which have recently passed under Greek sovereignty and also a good many places in Asia Minor, now under Greek control.

BRILLIANT PLAY MARKS BOWLING

Five New Teams Among the Leading 10 of the Five-Man Events in A. B. C.

TOLEDO, O., March 11 (Special)-Brilliant bowling marked the eleventh day of the American Bowling congress tournament here and new leaders in two events developed with a general shaking in the standings of all divi-

Five new teams rest among the leading 10 of the five-man events this morning. The Live Stock Press, Chicago, rolled the best set of games for 3887 and went into second place. They had games of 886, 1023 and 978.

Bowlers Journal, Chicago, followed close behind this high score with games of 962, 923 and 991 for a total of 2876, which was good for third.

Orpheums of Brooklyn took seventh place in the standing by bowling a 2804 total. Next, the A. S. Arnolds, Chicago, with 2802, placed ninth, and Brucks, Chicago, tenth by 2791.

The bowling of Blouin, Mariono, Shaw, Kafara, players of the Brucks and Arnolds, was disappointing to the capacity crowd which gathered to watch their efforts. Blouin's 570 was the best of these "stars." The work of R. Ocha and J. Spreitzer of Joliet featured in the bowling in the minor events. Collaborating for two games in which they each rolled 192 and 221, they totaled 1259, which put them in first place, 11 points over the previous leaders. Ochs' score was 625 and Spreitzer's 634. W. Bagnell and and Spreitzer's 634. W. Bagnell and J. Ladas, another Joliet team, went into sixth place by virtue of a 1208 score. The team started off well with games of 422 and 435 but turned in a locre third of 351.

Three changes among the individual leaders resulted from G. Nienaber. Cincinnati, rolling 672 for third place. S. Novak, Toledo, 663 for sixth, and L. Kohitzki taking seventh with 662. Nienaber's mark came from an even set of games making 232, 217, and 223. Novak bowled only fairly in his first two games, making 192 and 196. In his tw

Milwaukee was awarded the 1923 tournament here Thursday, when 250 delegates of the American Bowling Congress met for their annual transaction of business. Grand Rapids, the only other contestant for the event, drew after a standing vote ight all but three to their feet,

RIB-FACED MASHIES ALLOWED IN CANADA

CHICAGO, March 11-News that Canada had rebelled against the British rule prohibiting rib-faced golf

The United States Golf Association still is considering what action, if however, had the better of the last any, it will take on rib mashies; while half and at one time appeared to have the Western Golf Association virtual a chance to win with two Lowe and Campbells subs in the line-up. Long their use. The rib-faced club came shots by Southwestern forwards, into wide use after its introduction Gardner and Reif, featured Southwestamong American players because of the facility with which a ball could be pitched dead to the green. This type of club, however, is not essential to the shot, Robert A. Gardner, among

others, using a straight-faced iron to accomplish the feat perfectly. It was after Walter J. Travis had won the British amateur championship for the only time it ever was a captured by an American that the Royal and Ancient Golf Club barred the Schenectady putter, with which Travis virtually won the title by run-ning his balls dead to the hole from Travis virtually won the title by running his balls dead to the hole from almost any reasonable distance. The British disbarment of this putter was not followed in America, where the club still is allowed. British golf authorities also took cognizance of a putter used by former Champion Charles Evans Jr., allowing it to pass after the center of gravity had been shifted toward the chicago golf professionals and club.

Yale Swimmers Win

NEW HAVEN, Conn., March 10—Yale University defeated the Brown University team in one of the hardest-fought swimming contests of the season, 36 to 17. oUp the ming contests of the season, 36 to 17.

Chicago golf professionals and club takers expressed the opinion, after earing of the Canadian decision, that he rib-faced irons would not be arred on this side of the Atlantic.

Kalamazoo and Wabash Finalists

Meet Tonight for the National Intercollegiate Basketball Title

INDIANAPOLIS, Ind., March, 11 (Special: — Wabash College, Crawfordsville, Ind., and Kalamazoo College, Kalamazoo, Mich., will meet here tonight in the final game of the national intercollegiate basketball tournament being played in this city. The finalists are representatives of the middle west, Wabash being the Indiana star champion and Kalamazoo holding a like title in Michigan.

Last night Wabash defeated the Mercer University quintet, 62 to 23, in

Mercer University quintet, 62 to 23, in the first of the semi-final contests. Kalamazoo was forced to play all the basketball at its command to win

by a 22-to-13 score, the count being in no way indicative of the severity of the struggle, which was fast and hard from start to finish. The Kalamazoo team now has endured two very diffi-cult games qualifying as an entrant of 2876, which was good for third.
Next in line for the evening's honors came the Diamond B. C. of New York, who rolled 2837 by an even set of games. They drew into a tie for sixth.

Orpheums of Brooklyn took seventh to be much doubt about their winning this tournament. Of course, it cannot be denied that the Kalamazoo

went into nonentity whenever the stal-wart athletes from Wabash chose to

mediocre third of 351.

The team of L. Kerner, R. Kelly, Ligonier, Ind., rolled eighth in the high 10 standing with 1206. A last was the most obvious thing about the rame rally when Kerner hit a game of 255 was chiefly responsible for this sum.

In particularly impressive about the manner of the Grove City aggregation, but their inability to make fields goals was the most obvious thing about the team. Grove City passed very well and the easterners were able to take sum.

two games, making 192 and 196. In his third he ran a string of nine strikes straight, then pulling his ball a trifle too much to the right, he left pins 4 and 7 standing.

Kohitzski's first two games were the opposite as he did his best bowling in these and slumped in his last. His scores were 223, 234, and 196. Kerner, Ligonier, and L. Gazzolo, Toledo, went into tie for first place in the all-even with 1845.

Champions to Meet Lowe and Campbells

Expect Great Battle for National

brought all but three to their leed, no ballot being necessary.

Following the usual custom of the congress, all of the officers were advanced, President J. T. Smith, Buffalo, being retired to honorary life membership and E. C. Dyer, Toledo, the office.

KANSAS City, Me., March 10 (Special)—The national basketball championship won last year by the Kansas Athletic Club will remain in the hands of a local team for at least another life. One amendment of importance was season. In the semi-final games to-night the Blue Diamonds defeated the Indianapolis "Y," 58 to 27, and the limits the lineup of one team entered Indianapolis "Y," 58 to 27, and the in the A. B. C. to two employees of Lowe and Campbells, another home

> standing, and an hour later Kansas City's high-powered court teams will compete for the highest honor in the basketball game. The K. C. A. C. will enter the game a favorite, but the Lowe and Campbells have a team that will make a great battle against the champions of the 1921 tournament.

The Lowe and Campbells-Southwestelubs was received with much much set among the Chicago golfers because of the fact that Jock Hutchison, minutes of play. The college team minutes of play. The college team was unable to solve the five-man developed the Crimson five in the first minutes. professional at Glenview Golf Club, was unable to solve the five-man de-won the British open title last sum-fense of the Crimson five in the first mer, using such clubs for the last time that they were permitted on Brit-the basket. The score at the end of the period was 18 to 8 in the Lowe and Champells' favor. Southwestern, Campbells subs in the line-up. Long Singer again was the star in his team's victory over Indianapolis. The K. C. A. C. forward basketed 13 goals for a total of 26 points. Frank Hess, a guard, threw 14 free throws out of

Coach Wright Renews Contract

CARDINALS DISPLAY FORMIDABLE FRONT

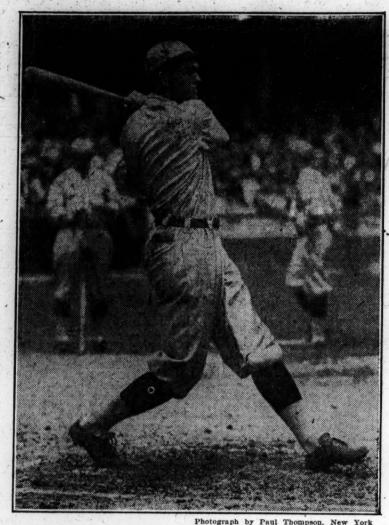

Hard-Hitting Veterans and Bolstered Pitching Staff Is Rickey's Portion

ST. LOUIS, Mo. (Special)-Baseball ans in the Mound City are looking for-

training quarters at Orange, Tex.
Warren Perry, who caught on a number of lot teams in Philadelphia, and
Gilham, last year with Syracuse, also
win be given a trial this spring.

The greatest strength of the Car-dinals is in the infield. Rickey has dinals is in the infield. Rickey has gathered a quartet of players which rank among the best in the circuit, John McGraw's 'Giant infield alone ranking "on paper" with that of the Cardinals. In order to bring up the caliber of the inner defense McGraw was forced to purchase Henry Groh from Cincinnati to fill third base.

Unless unforseen difficulties arise, ward to a big league season of the Jacques Fournier will be at first, Roger national pastime which is expected to Hornsby at second, John Lavan at rival the years of 1885, 1886, 1887 and shortstop, and Milton Stock at third. 1888 when C. A. Comiskey's team won the National championship. Everybody is talking of the splendid opportunity for the St. Louis National
League Baseball Club to win the pentheir respective positions, so collectiant the spacious Twenty-second

Rogers Hornsby, hard-hitting infielder with the St. Louis National League Club

nant in its division. The sole barrier, it is believed here, is the New York In order to bolster up the infield with Giants, but inasmuch as that team found the Cardinals redoubtable ophas purchased Del Gainer to serve as night, when they won 11 of the 15

baseball players with which to work cured from Houston in the Texas this season. Last year the team League to substitute for Lavan should boasted a good infield and outfield, but had a weak pitching staff. At that it finished in third place, and but for a poor start at the beginning of the season might have landed higher.

Doak is a hot weather artist and must wait until the sun is intense before In the A. B. C. to two employees of alleys. The Arnolds of Chicago are entry, eliminated Southwestern College of Winfield, Kan., 29 to 25.

At 8:30 o'clock tomorrow night Southwestern and Indianapolis will play for third place in the tournament play for third place in the tournament of the season, which had effect in keeping the Cardinals down.

Doak, with a record of 15 victories and six defeats for an average of .714, carried off honors as the leading National League pitcher in effective-ness. If Doak can repeat his performance of 1921 it should be a great help to the pennant ambitions of the

tica are expected to repeat their winning performances of last year. Haines had 18 victories and 12 defeats for ning pitchers in the National League In addition to the above trio Branch Rickey will have Edward Pfeffer Louis North, William Sherdel, James Walker, Arthur Riviere, Barfoot and Lester Montgomery. The last-named three are recruits who have come up this season for a try in the big leagues, while the others were at-tached to the Cardinal staff last year. Pfeffer was a member of the Brooklyn National League club last year and Though the big pitcher has seen his best days on the hill, Rickey believes he still has enough in his arm to pitch a few winning games. It is expected he will serve as chief relief hurler. Marvin Goodwin will be back with the Cardinals. Two years ago he created a sensation by his effective work in

Upon these men will depend the success of the Cardinals' efforts to clinch the National League pennant. If they turn out to be a winning staff, Rickey will have his fondest desires

Manager Rickey will have five men working out for the berth of first Arring catcher.

It in a catcher, will draw this position. If Ainsmith retains his former skill he may be favored, as Clemons can hit the ball in the pinch and may prove of more value to Rickey in this respect than as regular catcher. Clemons also will catch a few of the may be favored as Clemons can hit the ball in the pinch and may respect than as regular catcher. Clemons also will catch a few of the man also will catch a f string catcher. Either Edward Ainsmith, formerly of Washington and Detroit, or Verne Clemons, last year's regular catcher, will draw this position. If Ainsmith retains his former skill he may be favored, as Clemons can hit the ball in the pinch and may have of more value to Bickey in this position of more value to Bickey in this state, defeated I. H. Peterman, Wisconstant, or decision.

ponents last year, local fans hope the an understudy to Fournier at first, while George Toporcer, who was with It is admitted that Manager Branch the Cardinals last year, will work out finalists are representatives of that Rickey has a wonderful aggregation of baseball players with which to work cured from Houston in the Texas various classes were not numerous as occasion demand.

This year Manager Rickey has virJack Smith, Leslie Mann, C. F. Mueller
tually the same roster of veterans, and and Clifton Heathcote. Smith's hitting
Vanderple the other two positions will be between by falls; the others being decided by in addition has gathered a staff of 13 pitchers. From this number he hopes to select six upon whom he can depend to the fullest extent. Last year William Doak, Jesse Haines and William Pertical carried the bulk of the work.

Wanderploag of the Bullato 1 word ability will find a place for him in his first bout in the 135-pound class, but lost the decision to Laidman of the semi-final of this first bout in the 135-pound class. but lost the decision to Laidman of the semi-final of this first bout in the semi-final of this class and there was little to choose showed to such advantage in the clossoftward by Mueller, the local boy who showed to such advantage in the clossoftward by Mueller and Pertical Representation of the series on his first bout in the 135-pound class. MANY PROMINENT ATHLETES ENTERED IN NEW YORK MEET

Expect a Number of Intercollegiate Indoor Track and Field Coach Tesreau Has Hard Task Records to Be Broken in I. A. A. A. A. Games at Twenty-Second Regiment Armory Tonight

and field records are expected to be established this evening at the championship meeting of the Intercollegiate Association of Amateur Athletes of falo, N. Y. nent athletes of the country will take part; and it is expected the spacious Twenty-second Regiment Armory will be filled to its utmost capacity shortly after the doors are opened. In order to better accommodate the crowds, the Columbia University basketball bleachers have been placed at the north side of the track. This addition to the ordinary seating arrangements will provide a good vantage point for over 1000 extra specta-

universities are entered in the games and there will be over 500 individual

The 70-yard dash will provide the of the evening. With 70-odd entrants heats will be necessary, and when the semi-finals are reached some of the fastest runners of the country, will be on their marks. The record of 7 1-5s. sprinters; but it is deemed probable that this time will be shattered by J. A. Leconey of Lafayette. He has been traveling close to record figures this winter, and in the Johns Hopkins meet at Baltimore recently he negotiated the century in 10s. flat, defeating a high class field which included B. J. Wefers Jr. In the A. A. U. championships last Saturday he won the 60-yard dash in 6 3-5s. Leconey will be ably seconded by J. L. Kelley, a new sprint star from the same in-

J. F. Moakley, the Cornell University mentor, will present a new thrill in the person of F. K. Lovejoy. Lovejoy promises to be one of the strongest bidders for short distance honors this spring having captured the 75-yard sprint in the dual indoor meet between Cornell University and Pennsylvania State College on March 4

The University of Pennsylvania is

NEW YORK, March 11 (Special)-A depending upon H. B. Lever '23, who number of intercollegiate indoor track ran a close second to Loren Murchison, when the latter tied the American record of 6 2-5s. in the recent 60-yard national championship at Buf-Other entrants who are conceded

chance in the 70-yard event are Victor C. Graeb '23, Columbia; C. S. Miller '24, Williams; Robert LeGendre 22, Georgetown; C. H. Wansker, Harvard; C. R. McKim '24 and D. B. Lourie '22, Princeton; Allan Woodring '23, Syracuse; D. B. Taylor '22 and H. H. Hile 23, Pennsylvania State, and E. M. Pullen '23, of Dartmouth.

The one-mile run will probably result in a battle between M. L. Shields '22 of Pennsylvania State College and Walter Higgins '22 of Columbia Uni-More than a score of colleges and versity. Higgins has been unable to niversities are entered in the games keep himself in proper trim of late, due to the pressure of his college course, but his fine showing at the recent New York Athletic Club games nitial, and perhaps the greatest thrill when he ran the mile in 4m. 23s., portends well for his chances tonight.

It was originally planned to have spiked shoe runways and take-offs for those competing in the high jump, but for this distance is held jointly by six the management found it impractical to provide a pit, which means that soft shoes only will be permitted. This substantially curtails the possibility of a record being made in this event. The present record of 6 ft. 4% in. is held jointly by J. L. Murphy '23 of Notre Dame and Capt. L. R. Brown '22 of Dartmouth. Brown will be seen in action tonight. There is no recognized record for

the pole vault; but it is expected that 12ft. 6in. is likely to be established. The same is true of the running broad jump; but a standardized indoor record of close to 22ft. is probable. The 16-pound shot put should also establish a record, for several collegians, including J. H. Lee of Dartmouth have been heaving the ball more than 42ft: consistently.

The 35-pound weight throw will be run off outdoors at the Columbia University athletic field this afternoon. A mark approximating 45ft. is looked for.

TORONTO WEST END MATMEN FARE WELL

TORONTO, March 10 Special)-Members of the Toronto West End night, when they won 11 of the 15 contests in which they participated, with the result that nine of the 16 various classes were not numerous as expected, the wrestlers who performed were well above the average The St. Louis outfield also ranks in skill, with the result that all the with the best. ONLY FIVE LETTER MEN ON GREEN NINE

Ahead, but New Material Gives Promise

HANOVER, N. H., Special)—Immediately after the Dartmouth-Yale basketball game last Saturday, carpenters were set to work tearing down the huge temporary stands that had been erected in the batting cage of the Alumni Gymnasium to take care of the unusually large basketball crowds, so that the huge arena might be made ready for practice when Coach Charles M. Tesreau's first call for varsity baseball candidates appears.

There will be few veterans this spring among those who report, and Tesreau will have a real job before him to work together a combination to take on the southern trip, with but a scant three weeks to practice in. Seldom has practice begun so late in the season, but battery candidates have been out for two weeks playing volley ball and getting in trim for the ensuing strenuous weeks.

Although in previous years the battery has been considered the weakest part of the Green nine, it appears to be the one strong point of this year's aggregation. Capt. F. V. Tracy '22 will bear the brunt of this year's pitching, but he will be ably assisted by F. W. Steinhilber '23, a transfer from Holy Cross College, whose col legiate and preparatory school record is enviable. T. H. Burbank '24, last year's freshman pitching mainstay, also is in the running for the chief box assignment on this year's varsity. H. T. Barker '24, G. T. Murphy '24, and S. H. Lyon '24 are other sophomore candidates that have shown up

well in previous interclass contests. On the other hand it will be extremely difficult to find a catcher that will be able to furnish the high grade brand of catching that characterized Capt. M. P. Merritt and F. A. Ross Jr. of last year's squad, but both T. R. Miner '23 and F. X. Heep '24 have had varsity experience at this post and should fill the gap with practice. J. W. Seavey '24 also will be a contender with more than usual chances for the receiving end of this year's

varsity battery.

The infield presents a problem which will indeed be difficult to settle. Last season there were five infielders of first water caliber who were available, but of these men L. E. Maynard '22 alone is in college this year, and doubtlessly the first practice will THE FIRST GAME and doubtlessly the first practice will see him in his old position at short-

Boston's Twentieth Annual Automobile Show Opens With a Record-Breaking Display

Big Exhibit at Mechanics Building Contains Passenger and Commercial Cars of Every Type-Salon Opens on Monday

for the opening of the twentieth annual Boston Automobile Show, hundreds of people poured into the hall, ome of whom had been waiting outside for hours, to make sure that they would miss nothing. As the afternoon wore on, this little advance guard will be held in the salon of the Copley was increased by thousands and a Plaza, beginning Monday at 1 o'clock, would miss nothing. As the afternoon

the Garrison Street entrance, the effect is most striking. As planned by Ernest W. Campbell, the architect, dozens of bubbling fountains illuminated by electric lights, splash from fern covered rookeries, while natural trees arched from codumn to column, complete an outdoor woodland effect which eiges this. "Aigle of Fountains" which gives this "Aisle of Fountains" a fairyland aspect. Sportive fawns gazing out in surprise, under a canopy of rich green foliage and trailing rose rines, through which countless electric lights glimmer, giving the effect of starlight, complete this detail of

A French Garden Effect

capped by arches, while roses and foliage in profusion, together with the wondrous lighting of the whole the wondrous lighting of the whole scheme, recalls portions of southern France. The numerous posts and columns in this hall have been uniformly rounded, and treated by a process which gives the effect of Siena marble. These, arched by roses, and illuminated by small electric bulbs, connecting crosswise and lengthwise, give a decidedly beautiful effect. All the stairways are covered with flowers and foliage, the portals of which are and foliage, the portals of which are distinctively individual, while the perola covering the stairway from the xhibition hall to the basement, is strictly in keeping with the harmon-ious arrangement throughout. Even names of the cars are displayed on signs, which are part of the gen-

ral arrangement. In Grand Hall, on the West Newton decorative ideas and arrangements.
pended from the roof is an imuse electrolier nearly 50 feet in
meter, containing thousands of lights of various colors, all of which blend in spectacular harmony. Lines of light in squares, divide the ceiling into sections, while above all, the roof is covered in deep blue, which show-ing through rainbow shaded drop fes-cons in each section, gives a rose-colored atmosphere to the entire room.

set at the foot of the marble stairway, finished in matt gold and black, with ands of polychrome lights for relief, Fountains play on top of huge fluted and carved posts at the stage entrance, while down the main aisle electroliers

As in other years the booths are more or less uniform in design, so that no individual plan of decoration can disturb the arrangement as a whole.

conservative estimate of the attendance today up to closing time, is that more than 40,000 people will pass in and out of the building.

Coming into exhibition hall from the continuing until Friday, March 17 at 10 o'clock in the evening, an exhibition of those automobiles which can rightfully be classed as luxuries. Shown in an atmosphere of refinement, Shown in an atmosphere of refinement, impossible to get except at a private display, these cars appeal only to the most fastidious buyers, who are al-ways seeking something very much out of the ordinary

An American Show

The Boston Automobile Show is strictly an American affair, as none of the cars on exhibit are foreign built. Coming at the very opening of the spring season, this is perhaps more than a coincidence, for at the New York show earlier in the year, at least two cars were made outside of this country. This speaks well for the con-The balcony of the light well is apped by arches, while roses and bliage in profusion, together with the wondrous lighting of the whole cheme, recalls portions of southern made cars, the first question which the prespective buyer at the Boston fidence the buyers have in their own the prospective buyer at the Boston show asks is about the price he must pay. It is more noticeable this year than ever before, and it is safe to say that the money value of the 1922 model of any make, is far greater than at any time in the history of the industry. Prices right now are down to their lowest level, and in same cases are below pre-war markings.

This exhibit will be a record breaker in at least two respects—one the number of passenger cars and trucks shown, being not only larger than ever before in Boston, but also in the entire country; two, the attendance during the week will no doubt be greater than at any show in the history of the in-dustry. Coming as it does at a time Street ride of the building, an innova-tion has been introduced, which will give the Boston show the leadership the entire country are watching Bos-ton to make certain that their optimism is founded on fact. If the attitude of the dealers and visitors who are shopping today is anything to go by, the attendance and exhibit figures will be joined in the record breaking col-umn by the sales made and prospects obtained during these seven days.

There are 483 companies or individuals represented within the five halls and the basement of Mechanics Build-

pergola or temple has been ly, the Chevrolet, the four-cylinder Durant, the four-cylinder Overland, the Dodge, the Dort and the Maxwell. This is the largest number in this class ever shown.

TRACTORS

Hoisting Cars to Places in Balcony of Mechanics Building Only Small Part of Preparation Needed

and day since last Monday, have transformed the barren interior of Mechanics Building into a brilliantly lighted and decorated setting for the Twentieth Annual Boston Automobile Show which opened today.

A Boston advertising man once characterized the Mechanics Building as "the most versatile piece of real estate in New England," by which he meant that it is used for more diversiied types of exhibitions and entertainments than any other structure Divided as it is, into Exhibition Hall and Grand Hall, downstairs, and Paul Reyere Hall and Talbot Hall upbition that may be desired.

Prior to the time set for the automobile show, the last events to occur in the building were the dog show and the New England Hardware Dealers' show. The building has been known to emulate a four-ring circus, by housing on the same evening a boxdifferent types of events as this to collow each other on successive nights.

proximately 300 workmen were on the a different matter. job. First came the cleaners, who electricians and movers. Piles of cony they would have to be lifted up lumber, yards of wire, boxes full of by a derrick. This was accomplished all sorts of electric appliances, piles by attaching the derrick to one of bunting, thousands of electric bulbs and wagonloads of carpet and this anchorage the block and tackle other kinds of floor covering began worked perfectly, and the cars were pouring into the building upon the lifted without any trouble whatever heels of the workmen until, to the for the experienced men who handled uninitiated, the whole interior pre- the derrick. senteda scene of confusion.

Order From Confusion coils of wire, the piles of lumber and space has been taken. Some off to advantage the hundreds of motor amount of tranformation work ne

reruny vance, and those who directed the actual work knew exactly what they wanted done. The space accredited to each exhibitor was carefully marked off, and the entrance aisle and other aisles all provided for. All the workmen had to do was to work and that they did, from the time they began until the final hammer stroke before the doors were thrown open to the public

today. Gradually the building took on a different aspect. By the middle of the week cars began to roll in and were shoved into place where, covered with big sheets, they were left to rest un-til the opening hour. The little fences stairs, to say nothing of its spacious basement, it lends itself to almost any sort of entertainment or exhi
til the opening nour. In the first in the space were all put in place. The floor covering was laid, the bunting floor covering was laid, the bunting floor covering was laid, the space were spaced in the collection of the coll and chandeliers swung from the ceil-

MOTORISTS WILL HOLD IMPORTANT MEETING MONDAY

Leaders in the Automobile World to Gather at the Boston City Club All Day

One of the most important conferces of motorists ever held in New England is to take place at the Boston City Club Monday. It is to be an all-day session with a banquet in the evening. There will be addresses and discussions on many important points affecting the motor owners and the au-tomobile industry. While the majority of the delegates present will represent motor clubs in New England, there will be other officials on hand from some of the larger clubs throughout

The arrangements for the meeting were perfected by D. L. Morgan, executive chairman of the American Automobile Association, and President Fred K. Swett and the board of governments. Fred K. Swett and the board of governors of the Bay State Automobile Association of Boston. Every state in New England will be represented by delegates who will either make addresses or lead discussions.

Officials of the highway departments in some of the states will also be presented.

ent to give some ideas of how they view the motor laws, and the necessity for additional ones. In this way the motor owners and the men who are asked to interpret the laws will have a chance to sit down and discuss the subjects in which all are vitally in-

Westminsters would prefer to play in St. Paul, as they thought that Eveleth would have too small a rink. The trouble they may have got into, however, is that the St. Paul rink will be too large. Visiting teams have invariably become tired on this huge expanse of ice, which will hold almost two Aranas and its size is frequently.

Others who are down for addresses and discussions, and who are well known in motor circles are named in the following program:

Morning Session (10 a. m.)

of the meeting, William D. Selection of conference

on of Welcome—By the Hon.

normalic Association.

How Can We Best Minimize Motor Cidents—Lewis E. MacBrayne, general anager, Massachusetts Safety Council. Scussion by C. J. Biladeau, secretary, to Club of Berkshire County, and pt. B. J. Hoppe, traffic division, Bosar Police Department.

ton Police Department.

Value of Reliable Touring Information for Motorists—Raymond Beck, manager Touring Bureau, Cleveland Automobile Club. Discussion by James A. Hemstreet, Scarborough Motor Guide, Boston, and L. A. Dickinson, manager Touring Bureau, A. A. A., New York City.

Luncheon 12:30 to 1:30 p. m.

Afternoon Session

(2 p. m.)

Meeting to be opened by Dr. J. A. Chase, Pawtucket, R. I., past president, American Automobile Association.

Relationship Between Automobile Dealers and Motorists—Alfred Reeves, chairman National Automobile Chamber of Commerce, New York City. Discussion by J. H. MacAlman, president, Boston Motor Dealers Association, and Amos J. Shorey, New England representative, National Automobile Dealers Association.

The Need of Uniform Motor Regulations—R. B. Stocckel, Motor Vehicle Commissioner, State of Connecticut. Discussion by Hiram Ricker, president, Maine State Auto Association, and Lester H. Greene, secretary, Automobile Club of Vermont. Also discussion on "Headlights" by Oscar F. Ostaby of New York.

Benefits of A. A. A. Affiliation to Motorists—D. L. Morgan, executive chairman, American Automobile Association, Washington. Discussion by Donald A. Adams, secretary, New Haven Automobile Club, and Charles A. Frazer, president, Springfield Automobile Club.

ST. PAUL FAVORED FOR FIRST GAME

Large Rink Expected to Bother Westminster in Hockey Contest

To one who has seen both eastern and western hockey teams in action the probable outcome of the championship series between the Westminsters of Boston and the St. Paul Athletic Club, opening in St. Paul tonight, appears just as much a toss-up as did the hard-fought Minnesota elimination series which has just con-

St. Paul has a strong team, but only slightly, if at all, stronger than several of the other leading western teams, notably Eveleth, with whom she staged two remarkable scoreless ties, and against whom she won out

by only one point in aggregate goals.

Bostonians are familiar with the prowess of the Westminster sextet and they know just about what it can do against whatever the east has to offer. Few easterners, however, have seen any of the western teams in action, previous to the appearance of the Pittsburgh team last night, and as that team is not considered exactly as representative of the very best of the western circuits, local followers

are still groping in the dark.

If one were to predict that St. Paul would win her two games in the west, and the westerners their two games in the east, with the championship determined by total goals, he might not be far wrong. Prognostication, however, is at best a dangerous

practice.
There is one surprise in store, at on the part to hardly anything larger than to hardly anything any rate, for the Bostonians now in St. Paul. In spite of a general idea two Arenas, and its size is frequently blamed for the first night defeats which are so common there for foreign players. The distance between the rear of the goals and the banking boards is much longer than that at the Arena, and a player often thinks that he has had a hard day's work when he goes back to rescue a stray puck. For this reason, then, there is ground for the idea that St. Paul may

> The Westminsters will hardly be any more tired after their hard game with Pere Marquette and their long ride than are the St. Paul athletes who have just concluded a rugged series with one of the most vigorous and determined sextets in America-Eveleth. The little Minnesota town for two years has turned out a representative team on the ice which its backers firmly believe is better than anything in the land. Last year it played the entire national title series in Cleveland, decidedly an unfair handicap, yet came very close to conquering the team which had previdisposed of the Boston Athletic Association. Eveleth plays a hard. fast, and, at times, a little too rough,

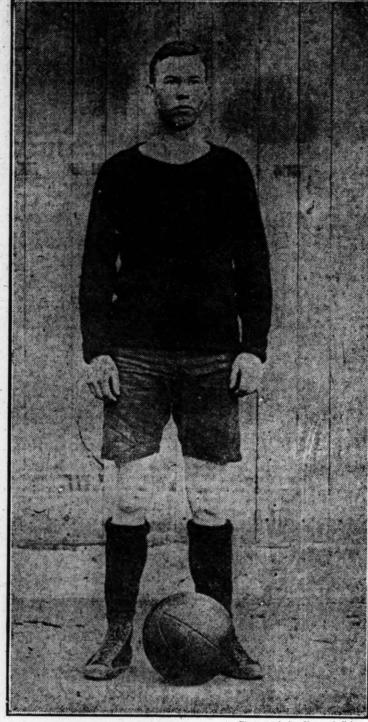

It is hard to allege that any one for many years. The one notable addition is the great Kjartan Jonasson, to the four winds. Jonasson is un-questionably the bolstering spot This is the second meeting of the which St. Paul needed to patch up year between Harvard and Yale, and last year's team and finish in front the first one in Cambridge for 13 this season, just as Duluth rallied so years. Feb. 7, in the first basketball greatly with the addition of Goodman, game between these two rival instianother ex-Falconite, who is declared the greatest player in the west. These quished the Blue, 26 to 13, and the Falcon men, all Icelanders, are tall, blond, wiry athletes, hard as their native cliffs, and brilliantly skaters and expert stick handlers. M. B. Elliott, the St. Paul goal, con-

tributed in large measure to the success of St. Paul this year. In fact it elimination games the small team far out-shot St. Paul, but simply couldn't penetrate Elliott alone.
T. A. Conroy and F. A. Goheen are two old-time St. Paul stars, and as they are both beautiful skaters and clever with the sticks, they can be counted upon to bother the Westminsters a great deal. The former is a wing, and the latter the center man. Emmett Garrett holds down the other wing post, and G. Elmer the other defensive position. Both are depen-dable men. St. Paul has strong spares in C. Weidenborner, and younger brothers of Conroy and Gar-

St Paul should come to Boste having slightly the upper hand.

Cardinals vs. Cleveland Tomorrow Cardinals vs. Cleveland Tomorrow ST. LOUIS, March 11—The St. Louis Americans were slated today to meet the Mobile, Southern Association, team in the first exhibition game of the season at the local team's training grounds in Mobile. Manager Lee Fohl has selected his regulars for the first game but has stated he will use some recruits if the opposing team cannot hold down the score. Another game with the Mobile team is on temorrow's schedule. The St. Louis Nationals will meet the Cloveland Americans in an exhibition game this afternoon at Dallas.

Boy Plunger Betters Own Mark PHILADELPHIA, March 10—Wesley Hassel of the West Philadelphia High School today established a new scholastic record for the plunge at a swimming meet at the Germantown Y. M. C. A. pool. Hassel plunged 68½ feet, beating his own record made last year by 9½ feet.

A. E. McLeish Jr. '23, Harvard varsity basketball captain

member of the St. Paul team is en- thoroughly eclipses that of its op- year resented the Minnesota capital city the year with Yale, in the Hemenway Gymnasium at Cambridge tonight, a top-heavy favorite. Well-seasoned, right defense, who was recruited from at the very height of condition, and the distintegrated Falcon team of winnipeg, which, after winning the of conquests, the Crimson quintet has Olympic championship in 1920, broke every reason to anticipate the conup and scattered its famous members test with great confidence; yet there

> tutions since 1908, the Crimson vanfact alone that this decided advantage was gained on the New Haven court is argument sufficient to declare a Harvard victory tonight

Harvard has won 16 of its 22 games this season, and one of the six defeats hase been wiped away by a later vicwas his work, largely, which turned tory over the same team. Contrasted is that the attack is not built around back Eveleth, for in several of the with this, Yale offers the record of any one man; instead it is vested in

Yale, this year, is not the Yale it was in the days when it was either romping off with or figuring prominently in the intercollegiate league championship. Since a December trip, when the New Haven representation toured the middle west and lost every one of its eight games, the Yale play has been listless, and sometimes, it has seemed, without object.

Coach Wachter of Harvard has a peculiar faculty for instilling the strong factors in Harvard's unexpecthands of the Connecticut Agricultural remaining games as if nothing had happened, and won them because she

forgot the past. Besides the Aggies, the teams of West Point, Dartmouth, Holy Cross, M. I. T., and Worcester Tech have taken games from Harvard. The through the fact that they were nced, or eliminated, through earlier through the Tech defense a week or later victories.

Basketball has made rapid strides at Harvard. It still has, however, Capt. A. E. McLeish '23 will start much room for expansion. Harvard in his usual position tonight, a fact students transferred from western which is regarded with great satis-colleges, invariably regard it as faction because of his consistency

| conference, for instance, it attracts

Enjoying every seeming advantage, and with a record at its back which titled to the individual honors. It is almost the same sextet which has repball team enters its second clash of worded this year to Coach Waching awarded this year to Coach Wachter. who is another athletic boss with a "system." and he believes firmly in it. He believes in the short-passing game, everyone playing the ball instead of the man, combined with the theory of a five-man defense, and a four-man offense. This means that every man on the team, when its opponent in possession of the ball, immediately throws himself into that position which he knows will be productive of the greatest possible strengh, without regard to the old idea of "letting the guards stop 'em"; and it, so it must be granted that Duffy's when his own team has the ball, at least four men are engaged in the Joseph Harris, John Collins campaign to maneuver it within strik-ing distance of the basket. This usually leaves one guard back in defensive territory.

Another point which differentiates the Harvard system from many others only three victories in more than 20 the strength of the machine. Team work is stressed as of the most vital importance. The use of defined rules for the man on the floor is usually avoided, and he is left more free to exercise his judgment. Five men must be always on the job in the Harvard system, and the passing and moving must be quick, fast and in the direction of the man who is in the best position. Long shooting and excessive individual efforts are discouraged.

The Crimson varsity squad enjoyed a rest yesterday, with the exception much-desired aggressiveness in his of a few men, who, apparently not men, and that has been one of the quite at the top of condition, were quite at the top of condition, were ordered out for a little limbering up edly fine showing this season. Start-Only one regular will be missing from ing the schedule with a defeat at the lineup facing Yale tonight, in spite of the fact that the team has been College, Harvard drove right into the badly patched in most of its recent remaining games as if nothing had games. Louis Gordon will not play. There is not much cause for concern in Gordon's absence, however, when the record of M. B. Lowenthal '23 is considered. Starting the season as a substitute, this player has worked his way into most of the regular schedule first three are discounted somewhat games, and time and again has been the most consistent scorer from the played in the enemy's camp, with no scrimmage floor. Lowenthal was the return game, and the last two are ballone man who was able to break and scored the great majority of Har-

vard's 18 points.

string forwards who can produce good BRANDON TEAM results if called upon.

The center berth will see V. W. Mil-

ler '23 starting in place of R. W. Fitts '23. John H. Sipp, E. S., Henry B. Tyson '23 and Walter Love '23 are unusually strong substitutes.
J. L. Rudofsky '24 and Isadore
Black '24, the stocky little sophomore

guards, who surprised the squad this year by capturing regular positions in their first attempt for varsity honors, will start as usual on defense. Both are rugged, determined players. Wachter has a pair of capable defense substitutes in Henry E. Feiring '23 and David F. Egan '23.

After the varsity basketball game the Harvard and Brown wrestling teams will hold a dual meet and with Curtis Nelson '24 and Francis Rouillard '23 back in the Harvard lineup, the Crimson expects to make a good showing. Brown has a strong team this year, having defeated the Massachusetts Institute of Technology team. 17 to 10, while Tech defeated Harvard, 18 to 0. The makeup of the two teams follows:

HARVARD 125—H. G. Freedman '23; 135—L. F. Holmes '24; 145—Curtis Nelson '24; 158—G. F. D'Wolf '24; 175—Francis Rouillard '23; unlimited—Benoni Lockwood '23. BROWN

125—P. H. Cox; 135—Dunstein; 145—C. T. Lazure; 158—Spelman; 175—B. L. Shurtleff; unlimited—Eckstein.

FOOTBALL SALONS CHANGE THREE RULES

NEW YORK, March 11 (Special)-No longer will a practically certain point be scored by a goal kick after a touchdown. The new rule which will govern the case requires the ball to be taken back to the five-yard line retary of the Intercollegiate Football McTiegue.

feet stationary on the ground is interpreted to mean that a sufficient momentary pause occur as to admit of officials seeing that the play is legal McNeill and Gibson were best for and that the ball was not snapped while the men were in motion. It is the intention of therule that when a man shifts to a new position he shall come to a ful lstop so that all momentum is lost and make a new start from a position of rest when the ball

is put in play."

"Clipping—Clipping is throwing the body from behind across the leg or legs (below the knee) of a player not carrying the ball, it shall be ruled as unnecessary roughness. Note: This rule is not meant to apply to close line play.

"Goal after touchdown — When a touchdown has been made, the side scoring the touchdown has possession of the ball anywhere on or outside the five-yard line for a scrimmage, from which by any legal play, as from an ordinary play, pass, kick or run, thehy may score a field goal or a touchdown, and that score of any the attacking side make a foul or illegal or incompleted pass, they lose their chance for the one point. If the defending side offend the score of

one point shall be given."

Mr. Camp stated that the work of the committee will be concluded in the early part of the afternoon but that

RED SOX EAGER FOR REAL GAME OF BALL

HOT SPRINGS, Ark., March 11 Judging by the way Hugh Duffy's regulars hit yesterday, there will be no lack of extra-base drives at Fenway Park this summer. No fewer than 20 baseballs were put out of bounds at Whittington Field, a fact largely accounted for perhaps by the continued drop in temperature, which made the day less congenial for pitchers than many an early April afternoon in Boston. However, the day was none too bright along men have found their batting eyes. George Burns all knocked the hall over the left field fence, a feat which had not been accomplished in the training period since 1920, when Pitcher Samuel Jones conquered the deep left field barrier.

A game between the regular team and the second string men, styled the "irregulars," is on the card for Sun day. In the event that Harry Leibold does not make his appearance by then, Frank McDonnell, the Greater Boston recruit, who has shown to advantage at the plate, will be assigned to center field and the leadoff position. The second team will be composed almost entirely of Massachu setts boys, with the versatile John Collins essaying to fill in at short

NEW WORLD'S MARK-IN CHICAGO GAMES

CHICAGO, March 11 (Special)-World's record for the standing hop, step and jump was broken here last night by Thomas T. Hoskins in the twenty-sixth annual indoor track and field games of the one hundred and thirty-first infantry in the Regimental Armory. Hoskins set up a mark of The best previous record was made by J. Cosgrove at Albany, N. Y., in 1894. James Hoskins, brother of Thomas, and D. V. Alberts, also exceeded the old mark. All three of the Chicago Athletic Association. For the four open events held last

night, the Chicago Athletic tion recorded a team score of 22 points as against 16 for the Illinois Athletic Association. The tanding hop, step and jump, standing broad jump, 1000-yard walk and the two-mile run were colleges, invariably regard it as faction because of his consistency the events held. The program will strange that the court game invites from the free-throw line. J. M. wind up tonight with the 40-yard, 440-yard low hurdles and tame excitement, while in the western Pallo '23 are dependable second-40-yard high hurdles.

IS ELIMINATED

Beats Ft. Williams but Loses Institute of Technology Votes to on Total in Two-Game Series

WINNIPEG, Man., March 10 (Special) — The Brandon Senior team, champions of the Manitoba Hockey League and conquerors of the Winnipeg and Manitoba University teams in the first two rounds of the western section of the Allan Cup series, was eliminated from further participation in the series here tonight when they defeated Ft. William, champions of the Thunder Bay League, by 2 goals to 1, but lost on the total in the two games by 9 to 7. Ft. William will meet the Regina Victorias in a twogame series here next week to determine which team will represent west-ern Canada in the final in Toronto later in the month.

This is the firs ttime in 11 years that the Province of Manitoba will not be represented by one team in the finals. Last winter the Brandon team lost the Allan Cup to the University of Toronto in a two-game series in this city, and tonight three of the players who were on the Brandon team then—Armstrong, Hill and Traer -starred for the Ft. William team. In fact, it was the brilliant playing of Armstrong in the two games, that made the Brandon defeat possible.

With a three-goal lead to overcome at the start of tonight's game the Brandon team's chances were diminishing when Armstrong scored in the

round presented a strong defense, and to be scrimmaged by the attacking it was not until the last period that team. Dr. Walter Camp of Yale, sec- Holmes and Gibson were able to beat Holmes and Gibson were able to beat

Rules Committee, gave out the three following rules, which will apply to the sport during the ensuing season:

Armstrong and Hill were don team. Armstrong and Hill were the best for the Thunder Bay champions, although every man turned in a very creditable performance, while

RECORD MAKERS TO RECEIVE CUPS

Reward Eleven Athletes

The advisory council on athletics of the Massachusetts Institute of Technology took steps at its monthly meeting this week to honor the Technology athletes who hold the present M. I. T. Athletic Association track and field records at the local institution. Eleven athletes who have made marks since 1914 will receive loving cups in recognition of their record-breaking performances.

T. H. Guething, who held the 440yard record jointly with his brother, C. T. Guething, until A. D. Smith equaled their mark later, made the distance in 50 4-5s. in 1914. The year after C. T. Guething made the quarter in the same time while A. D. Smith, who is still running for the engineers, joined their ranks in 1920.

Perhaps the most noteworthy performance in the list of M. I. T. records is that of last year's captain, Garvin Bawden, who ran the half-mile in 1m. 57s. Bawden made this mark in last year's New England intercollegiates, breaking the record for the Tech field track, which is quite an accomplishment when it is considered that the Technology cinder path is none too fast. In the I. C. A. A. A. A. meet at the Stadium a week later Bawden took a close third, competing against

a fast field.

The other recipients of the awards together with the event in which they performed and the year when the record was made are as follows: A. B. Curtiss, 120-yard hurdles, 1915; R. G .Brown, one mile, 1915; F. L. Cook, two miles, 1915; C. S. Reed, broad jump, 1916; J. D. Nagel, pole vault, 1919; C. G. Dandrow, hammer throw, 1920; J. W. Kellar, discus throw, 1920; W. D. Pinkham, discus throw, 1921 (held jointly with J. W Kellar)

At the same meeting of the Tech-nology Advisory Council it was voted to bestow discretionary awards of the insignia "aTa" to A. R. Tonon '22, and T. H. Gill '22 of the track team. Although these men have not turned in performances warranting the award of bona fide letters it was decided on the recommendation of the undergraduate athletic body that they deserved these awards on the basis of their consistent efforts with the track team during the past three years.

The rules for winning standards set

for winning the "T" in cross-country, which have often been criticized as too stringent, were amended so that it will be easier for a man in the PITTSBURGH TONIGHT and dale sport. Up to this point only those who finished within the first 10 future to win his letter in the hill

ix three-apartment, brick houses ated at 128-142 Fuller Street, Brookwith a total valuation of \$175,000, been purchased by Samuel Rud-from Dr. I. P. Ross. The parcel es 22,152 square feet of land. m E. McCoy & Co. negotiated

Edwardes & Warren report the sale of property at 1659-1663 Beacon Street, Brookline, consisting of two large brown atone, swell front houses known as The Winthrop and located at the corner of Winthrop Road, containing about 25 roms together with 16,738 feet of land, the whole being taxed on \$60,000. This property was a part of the Bridget E. Hastings estate, title coming from Edw. E. Blodgett and John Bapst Blake, trustees, to Harold Gordon King, who has bought for investment and development. It is the intended that the seems to consumption, due next week, will report a lessened off-take by the mills of the country.

In the long run, however, we believe that these features, which at the moment appear to be so disturbing, will be found to have been only minor incidentals that will be overridden by the larger considerations governing the ultimate course of prices. A clearer perspective than is now possible to obtain would show us that in spite of existing discouragements, cotton is gradually and surely being absorbed, and that inroads on reserves make imn King, who has bought for invest-ent and development. It is the inten-on of the purchaser to improve the Papers have been recorded in the

Contracts awarded in February of his year for building construction in lew Engaind had a total value of more han double the corresponding total or February, 1921, according to a report issued today by W. F. Dodge company. For the 27 northeastern tates of the country, a gain of 73 per ent in the number of contracts is resorded.

Contracts awarded in the 27 states mounted to \$177,365,000, an increase

Halsey Elwell has sold his concrete house, together with 10,600 feet of land, at 89 Morton Street, Newton Center, valued at \$12,500, to Howard Kite, who buys for immediate occupancy. Total assessment is \$7000.

Contracts awarded in the New England States during February amounted to \$15.623,000. This was more than double the amount for February of last year, and only 2 per cent under January of this year. It is the second largest February total on record for this district.

Among the items included in the February, 1922, total were the following: \$7,115,000, or 45 per cent, for business buildings; \$4,463,000, or 25 per cent, for residential buildings; \$1,599,000, or 10 per cent, for educational buildings; \$1,041,000, or 4 per cent, for industrial buildings.

The volume of contemplated new work reported continues large, the amount in February having been \$43.747,000, or nearly three times the amount of work actually started.

TRINITY COURT SOLD

NORTH SHORE ESTATE

Edwardes & Warren report final papers recorded in the sale of the summer residence of Lucius Tuttle, former head of the Boston and Maine Railroad, at Magnolia. This property contains a mansion house of 17 rooms, four baths, spacious lawns and driveways, with a double garage and chauffeur's quarters. Title comes from Jennie D. Miller of Dayton, O., to R.

O. Gately.

WASHINGTON STREET LEASE

The Old South Building Association has negotiated for a long-term lease of the street floor and basement at 300-306 Washington Street, near Milk, to Andrew J. Lloyd Company, which is forced to vacate its present building which is to be torn down. W. H.

Ballard & Co. negotiated the lease.

The Charles G. Clapp Company reports two additional farm transfers at Middleboro. Edward P. Harvey deeds

SOUTH END AND CAMBRIDGE George H. Reed has sold the property at 9 Greenwich Park, South End, consisting of a brick building, and approximately 2288 square feet of land. The building is assessed for \$4200 and the land for \$3300, making a total of \$7500. The purchaser, Ger-trude Dana, bought for investment. Henry W. Savage, Inc., has sold, for Mary C. Harnedy, the property at 318 Massachusetts Avenue, Cambridge, which she took title to last week. This consists of a single frame dwelling, together with 2177 square feet of land,

carrying an assessment of \$3800, of which \$3200 is on the lot. Charles B.

outside developments have been un-settling to sentiment. There is noth-ing stimulating, for example, in the sal of the United States to participate in the conference at Genoa position may be stated. Disappointment has been engendered by the confessed inability of the New England authorities to settle the Rhode Island strike through arbitration. It also seems fairly well indicated that the census report on consumption, due next week, will report a lessened off-

and that inroads on reserves make im-perative the production of a fairly large crop this season. According to Secretary Hester of the New Orleans Cotton Exchange, the available supplies of cotton in the United States at the end of last season were approximately 6,375,000 bales, exclusive of linters. On March 1, or at the end of seven months, these stocks had been reduced approximately 3,500,000 bales. Of probably equal importance is the fact that less remains to come forward as a result of last season's short crop, while meantime consuming manufacturers have been letting their stocks run down and are now reaching a point where buying for replensishment will become imperative.

Mr. Comstock's plea followed a conference of the mill owners, which began during the afternoon and lasted through the evening. The series of occurrences which are regarded as \$6.50; dried Canada green peas at \$6.256 having influenced this conference date from the holding firm of the strikers' ceipts, beans, 1340 bushels. early in the week. The failure of the mill men to get the Governor to intervene for them in their effort to prevent mass picketing and his decision to require that the employers go 21@23c; choice fresh at 21% 022c; firsts, to the courts for redress, if they are at 20@21c; fair to good at 15@19c; Young entitled to any, contributed to the uation. Decisive victories yesterday by the strikers in preventing the run-ning of mills in both the Pawtuxet Valley and the Blackstone Valley were

nettling to the mill owners.

The denunciation by the Episcopal clery of the State of the lack of conciliatory spirit on both sides is claimed strtikers to have a favorable effect to them on the public sentiment aroused. They say that they had not ignored conciliatory efforts up to the time that the mill owners declared for

secret deliberations for the purpose of preventing manufacturing costs be-coming public. What effect this statement by the clergymen will have with the meeting of the board of mediation and conciliation at noon on Monday is not apparent.

The morale of the strikers in the camps of both the United Textile workers of America in the Blackston Valley and the Amalgamated Textile Workers of America in the Pawtuxet Valley runs high today. Organizers declared that the statement by the millmen's counsel was "so full of holes" that the public's sympathy cannot be inveigled away from them

Samuel Gompers, president of the American Federation of Labor, comes situation, the strikers say, affords him a fine chance to answer the mill men in the public addresses he will make here and at Pawtucket.

Bellringer Calls Out

CROMPTON, R. I., March 11 (By The Associated Press)—Just before 5 o'clock this morning a bellringer went up and down the streets of this mill yillage calling to the people: "Everybody out to picket the gates!"
Lights flashed up in the little whitepainted cottages, and in 10 minutes or less strike sympathizers, men and women, were gathering about the entrance to the Crompton Company's cordurox and velvet plant, one of the many closed for weeks by the Rhode Island textile strike.

Yesterday the company threw open Yesterday the company threw open the gates and announced that its finishing department would resume operations. Nobody came to work but the overseers and second hands. Today the program was repeated. There was no disorder. The "iron battalion" at Natick, shock troops of the early weeks of the strike, did not should be a super the American and Reverse and Repair the American and Reverse quote granulated and fine as a basis of the Rumanian Farmers Cooperative Association estimates that the wheat in that country will hardly suffice for domestic requirements until the next haves. It is officially stated that there are no more than 200,000 bushels box; agaplant \$3,034 crt; lettuce, \$1,000 left. Export restrictions are tightening. Austria requires \$24,000 metric

mand. Preparations for the fifth of picket mills a "deadline" has been owners fighting this drive are of such proportions as to indicate they conthe adjoining village, and here trooplaider it no trifling matter.

CORN CROP CUT BEING PLANNED

partment of Public Works will inaugurate a campaign on the highways SPRINGFIELD, Ill., March 10-Illiof the Commonwealth against overnois and Iowa farmers, through their loading motor trucks. Inspectors will be stationed on all the important state organizations, plan to reduce traffic routes of the State to weigh their 1922 corn crops about 100,000,the trucks and enforce the law with 000 bushels by cutting down their regard to loading and the speed of corn acreage. The Illinois Agricultural Association has recommended It is declared by officials of the de- an average reduction of 15 per cent partment that this period of the year in the corn acreage of the State as a is the most critical for highway surfaces, wear and tear being increased means of placing the surplus of the by the softening of the road. During 1920 and 1921 crops on the market a brief period of inspection last fall, and stimulating corn prices. The inspectors of the department discovered a considerable ignorance of the lowa Farm Bureau Federation has recommended an average reduction of law among motor truck drivers, and it

is felt that inspection is the only 13 per cent for that State. If these recommendations are followed, agriculturists estimate the drop in production will result in 51,701,650 fewer bushels of corn in Iowa and 48,734,648 fewer in Illinois. These two states are the only ones in the corn belt in which a definite move toward reduction in corn acreage has been made, but leading agriculturists point out that there will be a considerable reduction in other states without organized effort.

Wheat, hay, soy beans, and forage have been recommended to Illinois farmers as substitute crops for the acreage they cut off their corn fields.

334 HENRY FORD TO MODIFY PLANS

WASHINGTON. March 11—Henry Ford, whose purchase and operation of the Detroit, Toledo & Ironton Railroad has been followed with siderable interest in the railroad siderable interest in the railroad world, has decided to modify his original plan for its corporate reorganization, according to indications given by Interstate Commerce Commission records.

Shortly after purchasing the railroad, the automobile manufacturer or-ganized a new company called the De-troit & Ironton for which he secured Interstate Commerce Commission permissions to issue \$1,000,000 in capital stock and to build a new line of rail-road in Wayne County, Michigan, sup-

road in Wayne County, Michigan, sup-plementing the original system. In adidtion, Mr. Ford sought per-mission to turn the entire properties of the Detroit Toledo & Ironton to the new corporation under lease, and to have the company guarantee outstanding security issues of the old

Certain minority stockholders of the old company, opposed to Mr. Ford's reorganization plans, entered objections in the commission's investigation of the matter and the commission recently issued an order stating that recently issued an order stating that "the applicant (Mr. Ford) requested that these matters (the granting of the lease) be held in abeyance, and accord-

ingly no action has been taken." The commission also noted that "it does not appear that the applicant desires to press the matter to a conclusion at this time, and in order to close the record applications will be dismissed."

The action of the commission, consequently, leaves the Ford railroad properties exactly in the situation that they were in when Mr. Ford acquired them, and in case he desires to lease the Detroit, Toledo & Ironton to the Detroit & Ironton it will be peecethe Detroit & Ironton it will be necessary for him to make a new applica-

The Michigan Public Utilities Commission coincided with the Interstate Commerce Commission in giving Mr. (Reported by Henry Hentz & Co., Boston)

Commerce Commission in giving Mr.

MANY INFLUENCES ALWAYS AT WORK IN STOCK MARKET

This Week's Price Movements Affected by a Variety of Important Factors

NEW YORK, March 11 (Special)-There are many factors, visible and invisible, tangible and intangible, th are at work in the stock market the time. Some are known only to a few at a given time. This is true of manipulative tactics by a pool of group of powerful market interests. Other factors are known in a general way, but their full force often is not realized.

The relative full force often is not alized.

There has been a large number of the factors this week. Because of a acknowledged professional charter of the trading, to a considerable tent, the movements were often walling, and difficult to associate with sedie developments or expectations. Among the numerous announcements which everyone interested in a market had an opportunity to adjust and time were the great numerous complete pamphlet reports of dustrial corporations for 1921. Not ally was the number of the reports with the number of the reports of dustrial corporations for 1921. Not ally was the number of the reports of the ference of the reports of the reports of the reports of the ference of the reports. The week started with the annual atempts of the General Motors of the Midvale Steel & remade public. Unquestionably are made public. Unquestionably ere were two cases in which the unvorable showings had been disquinted weeks, if not months ago, their present influence was nil. The treet is looking to the future and silves that both of these companies ill do considerably better this year. Then there were the excellent reports of the American Woolen Company and the Corn Products Refining ompany. They were exceptions. The usiness of the two concerns is separated in character about as widely as ossible. The woolen company, in which there is special interest in Boston and New England, was the first to estimate activities on a large scale. The woolen company in when the 1921 results actually were and after the publication of the common stock of this company. They were are always and facilities. The woolen company as been strong for several weeks. There was no special movement in when the 1921 results actually were and after the publication of the company.

fore and after the publication freport.

Later in the week came the report.

Later in the week came the report of the New York Air Brake Company. It showed only a moderate deficit in comparison with that of Midvale, Lackawanna Steel and several other corporations of about the same size. That particular day all the railway equipment stocks, except New York Air Brake, were strikingly active and atrong. It was not even quoted.

The American Sugar Refining Company annual figures were released the same day. They disclosed a deficit of over \$2,000,000 from operations not counting dividends. The common stock was strong, as it had been for several days.

Verification of Deposits on compliance with the State Law, de-depositors are requested to present their deposit books for verification during the months of March and April. Books sent by mall will be promptly verified and re-arred. ALVIN P. JOHNSON, Treasurer.

FOR BETTER TIMES

DON, Feb. 28 (Special)—In DUBLIN, Feb. 28 (Special)—At the of the uncertain state of the annual meeting of the Irish Cattle trader, the hide market resteady, while the weekly cables the massachusetts and Stock Owners Associational Bank, established about a year steady, while the weekly cables the massachusetts and a half ago, enables the Massachusetts. steady, while the weekly caples that specular tion, held recently in Dublin, the setts Trust Company to establish a help tanners to feel that specular chairman, Mr. Matthew Bruton, said branch in the Haymarket Square distribution in frequents with rich. help tanners to feel that specuin hides is fraught with risk.
x are now selling from 6½d. to
per lb., and best cows at 6d to
Calf is also steady, as chrome
Calf is also steady, as chrome
they hoped that, given a fair chance, Agency. The purchase includes all per lb., and best cows at 6d. to Calf is also steady, as chrome ers are finding it almost impossito seil calf leathers in view of competition of side leathers from kips and dry light hides. It is red that America is again taking from this market and that y large deliveries have been sent to some of the big tanners. hides are not selling in big s, but bargain lots find buyers ew of the insistent demand for p sole leather.

TINANCIAL NOTES

passing through a serious trial but they hoped that, given a fair chance, they deserved. Reviewing the work of the past year, he said that, while the prices of live stock fell to pre-war prices of live stock fell to pre-war of the revenues. The continuance of the crease in freights, rates, labor, and decrease in freights, rates, labor, and other expenses. The continuance of the country's As the main source of the country's As the main source of the country's as the main source of the nation's enormous proportion of the nation's should be the concern of all, Mr. Should be the concern of all, Mr. Bruton added.

Federal Court at Boston has sed trustees for the F. R. Shophurne.

BLACK LIST OF UNRELIABLE FIRMS

BRADFORD, Eng., Feb. 28 (Special) -Considerable interest has been aroused by the decision of the Bradford Chamber of Commerce Bradford Chamber of Commerce Commission a strong organized body of traders a strong organized body of traders as traders and legal and moral obligations. BUSINESS, FINANCE, AND INVESTMENTS

RUSSIAN DEBTS ARE A PROBLEM

Liability Is Conceded but Solution of Other Phases Another Thing—Trade Pact Results

LONDON, Feb. 22 (Special)—The Anglo-Russian trade agreement, which was signed on March 16, 1921, con-tained a declaration to the following

tained a declaration to the following effect:

"At the moment of the signature of the preceding trade agreement both parties declare that all claims of either party or its nationals against the other party in respect of obligations incurred by the existing or former governments of either country shall be equitably dealt with in the formal general peace treaty referred to in the preamble."

Both the Rritish and the Soulet on the questional Court of Treatment of the rouble it will be extremely difficult to arrive at a fair basis for compensation. It is, therefore, probable that some form of mixed tribunal will be set up for hearing claims for compensation and making awards in accordance with the rules laid down in the Treaty of Peace.

What attitude the Allies are likely to adopt on the question of Russia's counter-claims is more doubtful. Since delicate questions of international law are involved it is natural to expect that the new-International Court of International Court

the Soviet Government's good faith, and an opportunity for the Bolshevists to show how far their professions of a change of heart were genuine. It was generally considered that if this experiment were successful, it would serve as a useful stem. al peace treaty.

Trade Agreement Results Fair

een England and Russia during the set year has not come up to the extensions of some enthusiasts; but sia, the settlement of the question of debts and compensation should not insuperable difficulties. on the other hand the actual figures have falsified the predictions of those who foretold that trade would be impossible under the Bolshevik régime.

But the amount of trade done, though it has been by no means negligible, has not been the most important result of the trade agreement. British prisoners in Russia have been repatriated, and though there have been occasions on which the British government has had to complain about the activities of real or supposed the activities of real or supposed few months of 1921 than during the prevailed for some time past. This is the activities of real or supposed Bolshevist agents in the Far East; the attitude of the Soviet Government has been on the whole conciliatory and nothing has happened to justify cancellation of the agree week are these:

China shipped more wool during the last few months of 1921 than during the preceding year. From July to November, 1921, inclusive, China exported 109,733 piculs (1 picul equals 133.3 pounds), walle in the same period of 1920 it exported only 35,201 piculs.

M. Krassin Helps F. Ans

Another factor which has paved the way for the conclusion of a general eaty has been the personality of M. Tassin. M. Krassin is a business an, who sets little store by the docnes of pure Communism. He has eated a favorable impression on Mr. oyd George and on influential Briting in description. The Woolen's (Ltd.), of Cape Town, has just completed the erection of a woolen industrialists and financiers. Most only who have met him would agree.

The visible supply of American cotton at Bremen on January 31, 1921, was as follows: Stock on hand, 149,000 bales, and aboard vessels, affoat, 100,000 bale Krassin impressed me as too senman to have given his

vernment being invited to the Genoa

At an international conference of ment must recognize the debts of the late Imperial Government and also of Russian municipalities. This the Soviet Government has expressed itself willing to do, with the important or counter-claims on the part of Soviet Russia. The most important of Soviet Russia. The most important counter-claims will of course be in counter-claims will of course be in late of the industries are operating on the Allies to the counter-revolutionary forces in the late civil war.

Important Russian Claims the Allies to the counter-revolutionary forces in the late civil war.

Important Russian Claims

It is understood that the Russian Government will base its claim on the fundamentals of international law, and in particular on those acted upon in the famous Alabama dispute between Great Britain and the United States. It will be remembered that the arbi-trators held in this case that the trators held in this case that the British Government was liable to pay damages for the action of private British citizens, who assisted the rebel forces during the American Civil War. If the allied governments are now compelled to recognize the Soviet Government as the legitimate successor of the late Imperial Government, in order to obtain recognition of the Tsar's debts, it will be difficult to resist the counter-claims put forward

Tsar's debts, it will be difficult to resist the counter-claims put forward on this ground. This question concerns the United States Government equally with the European Allies.

There were small American forces in the expeditionary force which landed at Murmansk and Archangel, and there were American officers attached to General Koltchak's staff. Inasmuch as there was never any formal declaration of war against Soviet Ruesia, the intervention of the Allies and the enforcement of the blockade raised difficult questions of interna-

full advantage in the peace negoti-ations. It will be difficult to dictate terms of peace to Russia in the way which the Allies were able to adopt in the case of Germany.

Bond Holders Also Have Claims

The international conference of foreign bond-holders also passed a reco-lution in favor of submitting claims for compensation for losses suffered by private individuals to international courts of arbitration. It is natural that foreigners should have no confidence in the administration of Soviet law. Moreover, owing to the tremendous depreciation of the rouble it will

Both the British and the Soviet that the new-International Court of Justice, recently established at The governments recognized their liability to pay compensation to private persons who have legitimate claims.

The detailed mode of discharging this liability was left to be regulated in the general treaty of peace. the general treaty of peace.

The trade agreement has now been in force for nearly 12 months. It was regarded as a practical test of such questions will be best dealt with

ful, it would serve as a useful step-ping stone toward the conclusion of a matter; but the most hopeful feature in the situation is that Russia's need of peaceful relations with the outside world is now the dominating factor On the whole the trade agreement has been justified by results. It is true that the volume of trade between England and Russia during the world is now the dominating factor in Soviet policy. If, as now appears probable, the Soviet Government is really anxious to come to terms with Western capitalism, and open the way

possible under the Bolshevik régime. According to figures given by Mr. Baldwin, president of the Board of Trade, in the House of Commons, imports from Russia, up to December 31 last, have amounted to £2,400,000, and exports to Russia to about £2,-100,000. These figures leave out of account a considerable volume of trade which has taken place indirectly with Soviet Russia via the border states.

The Soviet representatives in London state that their purchases have amounted to nearly £10,000,000 during the last year. Before the war the total surplus on Dec. 31 last was \$4,-296,683, against \$4,763,109 in 1920. The ratio of current assets to current liabilities is 7 to 1. In view of this position the directors say the present dividend rate is likely to be maintained.

who have met him would agree Most of the expert operators come from the woolen factories of Yorkshire, England,

There are five establishments in the ce to the original principles of Province of Manitoba which manu adherence to the original principles of Bolshevism."

M. Krassin has been chiefly responsible in bringing about the improved relations between Great Britain and Russia, which have led to the Soviet Government being invited to the Genoa

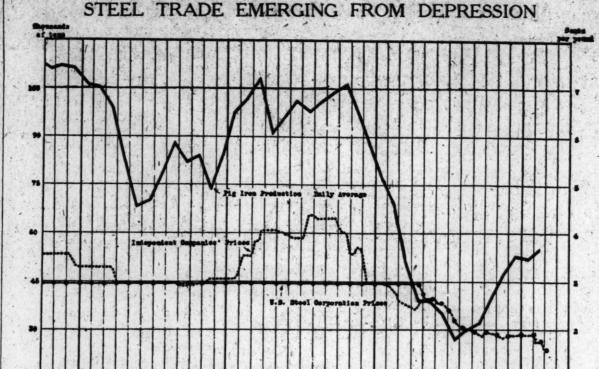

t an international conference of clations for the protection of for-interests in Russia, which was in Paris on Feb. 11, resolutions a passed laying down the condist which should govern the general ty of peace. The most important lition is that the Soviet Governtument of Commerce have been instrumental in making adjustments in this matter.

can cottons, the origin of which they are certain.

The Brazilian Ministry of Agriculture, through its sericulture experiment station at Barbacena in the State of Minas Geraes, has made sufficient headway for the incorporation of a company to erect a modern silk factory at Campinas, Sao Paulo. Mulberry trees are grown with considerable success in Brazil. The quality of Brazilian silk is claimed to be of the best, withstanding all unfavorable effects of washing.

Dundee, as an important center of textile industries, is evincing serious apprehension as to the probable results of the Britis') embargo now placed on foreign drestuffs, particularly those of German production, believing that it will prove a decided handicap to the jute and linen industries of this district in competition with similar industries of other countries in the world's markets. Mill & Lumber Company reports for 1921 gross earnings of \$259,384; administrative expenses, etc., \$429,172; deficit \$169,788; inventories \$551,795; deficit \$721,573; dividends \$267,314; deficit \$721,573; dividends \$267,314; deficit \$989,887. The balance sheet as of Dec. 31, last, shows cash in banks and on hand \$4,900,489; accounts receivable trade \$514,204; accounts and notes receivable general \$386,497; in-

this ground. This question connected the United States Government raily with the European Allies. There were small American forces the expeditionary force which ded at Murmansk and Archangel, it there were American officers attended to General Koltchak's staff, amuch as there was never any fordeclaration of war against Soviet sein, the intervention of the Allies the enforcement of the blockade and difficult questions of internations and law, of which the Soviet repetitions had compelled American goods have a merican goods are rapidly regaining their former dominant position in the markets of the Red Sea district. During the war Japanese goods entered the market in large quantities and transportation difficulties resulting from merchants to abendon. Deficit for 1921-22

After a decline in activity extending through a period of about 10 months, the iron and steel industries apparently reached the bottom of the trough of depression in July, 1921. The sharp upturn since then in the production of pig iron is indicated in the accompanying chart. In like manner, steel ingot production, which had declined by July to a rate equivalent to only 10,000,000 tons a year, had increased by October to a rate of about 23,000,000 tons, and at present it is equivalent to a rate

The chart also shows the course of prices charged for certain steel products by the United States Steel Corporation and by the so-called independent companies since the autumn of 1918. The maintenance by the corporation of the prices fixed by the United States In-

HIDE AND LEATHER TRADE ABROAD

LONDON, Feb. 17-In spite of doubts for the British hide and leather trade, the market remains very steady. Best ox are bringing from 6d. to 8d. per pound, and tanners are not at all inclined to give more, in fact, unless there is soon a better demand for leather, it will be quite impossible to pay even this price. Best calf skins are selling as high as 15d. per pound, the tanners of fancy suede colors being big buyers. The Americans are been visiting Dublin for the purpose also stated to be buying a proportion of giving accurate information as to of the raw stock in calf.

trade, sole leather tanners are mov-ing off quite a lot of leather in small before returning to France. In an inparcels. The fact is merchants are doing their best to depress the market, while tanners are boosting it. Anyhow Christian Science Monitor Mr. Kerney parcels. The fact is merchants are while tanners are boosting it. Anyhow the general tone is better, and if an improvement in the export trade should crop up it would seem that should crop up it would seem that the right man in the right place.

It was essential, he pointed out, to vival of prosperity. Upper leathers are still a slow sale, and shoe manustration with France, though he quite recognized the differences of opinion that low grade selections. Glazed kid tanners here are finding trade very diffinity and the price of raw skins is man, he explained, prefers to sell at mounting, while shoe manufacturers the factory, while the Irishman always are insisting on cheaper leather. wants to sell on the spot, and at pres-Curriers of semi-chrome are almost ent the Irishman who wished to deout of business, as the price of straight chrome is on such a low level that it competes well with the supply of grays and certain browns is not sufficient to meet the supply lay.

TRADE SINKS LOW

RIGA, Feb. 24 (Special) - Like verything else in Russia at present the naphtha industry is going from bad to worse, thereby further enhancing the dearth of fuel which plays no small part in the present deplorable state of the country, and also further crippling the means of transport. The present percentage of the springs now being worked at Baku may be put at 14-15 per cent of the pre-war number, which amounted to about 3600. The first important decline took place in the summer of 1917. This was accelerated during the October revolution and when the Soviet Government set about the nationalization of this industry there was 1500 springs in ophad decreased to 800 and at the end several cases of 1921 to about 600; the number of springs out of action in July, 1913, was about 1600 and now it is about

The Soviet Government has made some attempts to let the springs to their previous owners or other capitheir previous owners or other capi-talists, but as an official and out-her imports to £203,000,000. spoken journal explains: "As the Soviet Government, on principle, cannot give was essential but to make a success ruarantees and only prohibits the men of it her imports and exports should be reduced. Mr. Kerney made it very will doubtless be difficult to let any industrial undertakings, in any case, to break a monopoly in trade and into trustworthy people." Petroleum has risen tremendously in price. In Baku it costs some 50,000 rubles per pool (about 35 pounds) and twice as much in Sebastopol, and in the open market, owing to a tax of 100 per cent, prices, of course, soar still higher.

WORK ADVOCATED

DUBLIN, Feb. 24 (Special)-The an-

nual meeting of the Institute of Bank-

ers, Ireland, was presided over by Mr. S. D. Budd, chief officer of the Provincial Bank of Ireland, who, in the course of his remarks said there was different nations should go a long no short cut from the financial difficulties that existed and there was no more work. The chairman said that a conditions of banking within the last 20 to 50 years and to excel in banking it was essential to be thoroughly equipped for the several duties that must be performed, whilst the significance of the changes that were constantly taking place around one had to be grasped. There were very serious problems which faced not only Ireland but the whole world, and there was no quick remedy to be found to relieve them. He considered that there must be increased production. Work uphill was the only way to add to wealth, he added.

IRISH LINEN

DUBLIN, Feb. 22 (Special)-Private report says that linens are in good de-mand in the states and that the Ulster Linen Merchants Association has done very satisfactory business in New England and on the middle Atlantic coast. Travelers report that good orders in all classes of household linens have been received from sev-It is expected that dress linens will be popular this season for spring

The association'is finding that Belgian made goods such as canvases, paddings, and similar goods are landed about 25 per cent cheaper than similar merchandise manufactured in Ireland. This is a matter that lies entirely between the linen jobbers and

IRELAND'S GREAT TRADE PROSPECTS

Endeavor to Stimulate Commerce With France Undertaken by Irish Consul

DUBLIN, Feb. 22 (Special)-Mr. Kerney, Irish Consul to France, has the French point of view of trading The leather market is difficult to diagnose, and while jobbers are loudly complaining of the lack of to obtain as many ideas as possible

Has Great Possibilities

Ireland, Mr. Kerney thought, was awaking to the knowledge of brilliant possibilities, and at the same time to possibilities, and at the same time to her own shortcomings. This, he said, was the dawn of reason, because an individual or a nation by recognizing its faults was taking the first step to correct them. At present there was a slump in trade in every conwas a slump in trade in every country and the cry "export, export and don't import" was impracticable and unbusinesslike. The French were anxious in consequence to revive trade, and Mr. Kerney said he had appealed to French interests by the information that Iraland was been to formation that Ireland was keen to obtain French goods, and some of the firms he had already approached were

eager to export to Ireland.

The question of currency was a hindrance, because of the frequent fluctuation in the exchange, but this problem might be overcome by inducing French firms to open depots in Ireland from which they could quote for goods in the Irish currency. This, Mr. Kerney added, was his own idea eration. At the end of 1920 the number and had been favorably received in

Ireland's Foreign Trade

Ireland, The Christian Science Monitor representative was informed, had a bigger foreign trade, export and import, than any other country of the same size. In 1920 the value of her

The building up of Ireland's trade was essential but to make a success basis for any country's trade. present 99 per cent of Irish exports. went to England, or through England to other countries, while 78 per cent of the imports came from England. Ireland must, of course, trade with her neighbor England and she had there an important market: It was a FOR WORLD NEEDS sound policy to buy what England herself produced and manufactured, other countries; it was right to buy goods from the country that produced them and not through another coun-

In answer to a question Mr. Kerney said that a brisk intercourse with way to liven trade up, and on its being pointed out to him that the many efforts made to start trade between Ireland and other countries, including France, had failed owing to the inability of the Irish to fulfill the orders satisfactorily, Mr. Kerney said he thought a home government tak-ing a fatherly interest in the nation's endeavors and giving helpful support would make a tremendous difference.

Reputation for Tenacity Mr. Kerney spoke very highly of the route started last August between Dublin and Havre by the Michael Murphy line. It had been, he said, work, but the company had stuck to it tenaciously and deserved success. In Mr. Kerney's opinion the Irish had created the reputation for enacity held by the English.

DEMAND IS GOOD Questioned as to the Granville route Mr. Kerney replied that this route proposed by him a year ago was only being considered at present Granville was a small port of about 10,000 inhabitants east of St. Malo, but it would be on the direct route from Paris. As large steamers did not call there, special attention would be given to Irish goods, and greater facilities would be placed at their disposal. Passengers would be able to travel by this route, which he had hoped would be opened in March. Nevertheless it would be a pity to start before success was assured

DENVER ROAD'S BOND POSITION

NEW YORK, March 11-Richard Sutro, chairman of the committee representing the 7 per cent adjustment mortgage bonds of the Denver & Rio Grande railroad, in announcing the extension of time for deposits of the bonds with the American Exchange Bank to March 31, states that the committee, in cooperation with the trustees, has made important demands in protection of the interest of the holders which should greatly strengthen the position of the adjustment and refunding bonds. The committee adds that prompt action on part of holders will materially assist the committee in such further action as may be advisable.

GREAT BRITAIN **COTTON FIELDS**

Effort to Cultivate Lands Within British Dominions Not Yet Very Successful

LONDON, Feb. 22 (Special)-Great Britain-has been frying to produce cotton in its own Empire fields since 1902. Raw cotton has been culti-vated in lands within British dominions for much longer than this, but the purpose of growing staples assumed an organized form in that year. The object was to render the Lancashire spinning industry less dent on America, if not to make ether independent of the plan-of the southern states. The ent, however, has not met

experiment, however, has not met with any great success so far.

The reason for alluding to the matter at the present time is to point out that the venture has now been put on a wider footing. It is being taken up more actively by the Board of Trade and specially promoted by the Empire Cotton-Growing Corporation, a new national organization with offices in town, which has lately held its first general meeting. The Government has shown practical sympathy with the institution and granted it the use of £1,000,000 for the promotion of British cotton.

Cotton Growing Association

Cotton Growing Association

There is still in existence the original British Cotton Growing Association, with a suite of offices in the reconstructed Royal Exchange at Manchester. This association originated in 1902, when the British spinning and weaving industry was suffering severally through a shortage of American crops. The outlook at that time was very dark Mill companies fell into bankruptcy, and cotton operatives were reduced to a state of destitution. To lessen the risk of such a catastrophe recurring the association came into being with the object of producing suitable raw fibres in British-owned countries. In 1905 it became an incorporated body and subsequently appealed for a capital of £500,000, which sum has not, however, yet been subscribed, in its entirety. It was to be used for experimental work in untried fields, and no profit was expected from it. Most of it has in fact been exhausted by yearly expenditure. Cotton Growing Association

st of it has in fact been exhausty yearly expenditure.

In 1910 the Government came to a aid of the association, making it grant of £10,000 a year for six lears, this grant ceasing on March 1, 1916. Through the Colonial Office, a sum of £1000 was given by the co. a sum of £1000 was given by the sovernment for the season 1916-17, and other grants were made later.

ADVERTISEMENTS, CLASSIFIED

REAL ESTATE WINCHESTER

At the old-time prices—just completed, an attractive 7-room house with tiled bath, living and dining rooms finished in gunwood, on thoughout. The living room is a pleasant, sunnyroom with large dreplace; house is heated by steam, has beautiful fixtures and interior decorations; a well-built house which 2 years ago could not have been built and sold for less that \$12,000. There is 10,000 sq. ft. of good land, with the very best surroundings, and the price is unusualy attractive, \$3700. This just goes to show that houses can be built and sold at practically the old-time prices.

OWNER LEAVING STATE

Is forced to self his very attractive home on

OWNER LEAVING STATE
Is forced to sell his very structive home on
west Side. An ideal home for a small family,
Many attractive features include hot water
heaf, the best of hardwood floors, house newly
painted and shingled, not a cent's worth of repairs needed; 15,000 sq. ft. of land; shrubs,
shade trees and gardens; garage with room for
3 cars; 10 minutes to station. Price \$15,000.

ON CORNER LOT
In the section of West Side, attractive 8-room
house and single garage; living room 30 feet
long with dreplace, all in good condition; 11,000
sq. ft. of land. Price \$11,000.

Edward T. Harrington Co. CHURCH COR. COMMON ST.

The NEWTONS

NEWTON HIGHLANDS Right rooms, steam heat, large living room finished in gumwood, fireplace. This is a most attractive home and is offered for sale as owner's business takes him to St. Louis. Price for quick sale \$10.500.

WABAN Nine-room house, recently renovated, steam heat, all hardwood floors, screened plants, sleeping porch; two-car garage; accepted street. Beady for immediate occupancy. \$12,500.

Joseph Congdon 1631 Beacon St., Waban CENTRE NEWTON 705

CALIFORNIA

Would you like to live among beautiful trees at 4500 feet above sea level, with unobstructed view over footbills and valley for miles, trout stream running right through your own place, on automobile road to the General Grant Park; where you can raise the most delicious vegetables and betries of every kind; apples of beauty and flavor unsurpassed, only 80 miles from the City of Fresno!

There that place and will sell 13 1-3 acres at \$100 per acre. Also have 80-acre sfarm in Tulare County, all in grain this year, has large house, and other buildings, piped for irrigating, pumping plant, small orchard and vineyard. This place is in the great dairy section of the county and is splendid soil for the production of raisin grapes.

Beasonable terms.

Free \$30,000 on the 80.

MUSIC OF THE WORLD

Greece Encouraged to Hope

as, whose work shows the strong nce of the French composer enet, by whom he was greatly ned, is best known by his

Music for Church and Revue Another composer of merit is Napoleon Lambelet, who has written many things, among them some oratorios for the Greek Church. Some of his operatias, and his opera "The Victory of Leonidas," met with great success.

One of the youngest and most successful of the Greek composers is Theophrastos Sakellarides. He is a very popular composer, and his works, which are full of charm and noble sentiment, interpret the Greek feeling, and make a strong appeal to the public. His compositions show a certain degree of originality and much Greek coloring, and he seems assured of a great future. His operettas such as "Vaptisticos" and also his folk songs are greatly in vogue in Athens: Kokkinos is also popular by reason of his folk songs.

of his folk songs.

Quite a feature of the musical life quite a feature of the musical life Athens are the excellent vaudevilles revues relating to the events of the and other popular topics. The texamples of these are adapted to rds written by the well-known ek author, G. Tsocopoulos in coloration with Babis Anninos and ybios Dimitracopoulos, peculiar branch of national ek music worthy of special notice.

taken and hundreds were turned away. The price of admission is 25 cents and the recitals are held at noon in order that workers may attend. The concerts will be given once a month and only high grade music will be presented, a plane and vocal soloist alternating at every other representations. At Company has at last taken the stage and relieved the impatience of its shareholders, and, incidentally, by that of the music public generally, by the concerts will be given once a month and only high grade music will be presented, a plane and vocal soloist alternating at every other representations. At Company has at last taken the long doubt gain in breadth with reportion, but nothing could surpass the charm of her singing or the liveliness of her expression. No doubt there was a shade too much delicacy in it at times; but this is a defect on the right side: the theater unfortunately exacts a certain measure of avances. away. The price of admission is 25

the association, which hopes to have an endowment fund for the orchestra. The next concert will be given on April 1 and the program will include Lisst's concerto in E fist.

A Family of Organists

Edwin H Lemare, the municipal organist of Portland, Me., declared a while ago that he believed his taher. Edwin Lemare, of Ventuor, Isle of Wight, having played in one church for 80 years, held a world's record Mr. Lemare said that he took his first lessons in organ playing from his father. Later he went to London and attended the Royal Academy of Music, becoming John Goss scholar. He also served for a short time as professor at that institution. Speaking of music in the organ in a London church, and that his uncles on his father's side were all musical.

Bradford papers aways refer to Miss Thornton. So well designed to the form to make her reputation in the one in which Miss Thornton sings her former part of Ammeris, which did so much to make her reputation in the days of the Quinlan opera and to consolidate it in those of the Beecham. The popular success of the first make her took his first lessons in organ playing from his father. Leare he went to London and attended the Royal Academy of Music, becoming John Goss scholar. He also served for a short time as professor at that institution. Speaking of music in the family, he noted that his grandfather. Frederick Lemare, used to play the organ in a London church, and that his uncless on his father's side were all musical.

A Year of Music in Spain Shows Return to the Classics

Orchestral Performances Limited in Number but Choirs and Opera Are in Flourishing Condition

Madrid, Feb. 10. Special Correspondence. HE year which has just ended has been abundant in musical events, although orchestral productions of any consequence have been very few. In the land of the Rhine and the Danube, where music always held sway, the Empire of Art has had a renaissance of unequaled splendor as if it had been beyond the reach of the recent devastation of war and the brutal struggle of arms. This is truly an encouragement to the progress of meshetic ideas; but on this side as

concretely in the phrase "Let us go back to Mozart."

Perhaps the reason for this lies in the fact that so many works of the old masters which have been forgotten on the shelves for years have been revived for the public in the many celebrations which were held in homage to the great and only Beethoven on the one hundred and fiftieth anniversary of his birth as well as the scarcity of new, interesting compositions, most of which are tiresome, uninteresting and audacious innovations of ultra-modernism. In Spain we have done our share with the presentation of "Fidelio" in Barcelona and "Egmont" with verses written by Marquina beautifully recited by Miss Catalina Barcena, a happy and novel idea of the director of the Sinfonica. Orchestra, Señor Arbos, and one to which the Madrid public responded with great enthusiasm at the Teatro Real.

A Hearing for New Works

Notwithstanding the fact that the

Notwithstanding the fact that the love for the old masters has been revived we have not neglected to include in the various programs modern works hitherto unknown to us. Although most of these programs have been given by orchestras of Barcelona and Madrid, which cities might be called the barometers of culture and sings with exquisite taste exotic Slavic called the barometers of culture and sings with exquisite taste exotic Slavi musical progress of our nation, it is chants richly harmonized along mod-only just to mention the efforts of ern lines but preserving at the same other cities of Spain where the mu-time their national flavor. sical culture is fomented and sup-ported by the organization of Phil-acter which have visited us and that

Wagner, Brahms and Strauss.

The Spanish symphonic (which I regret to say is

1 by our energetic conductor Sefor Benedito, who has won laurels for him-self as well as honors for his country by directing works of our composers with the leading orchestras in Ger-

Inequalities of Compensation Great enthusiasm has been shown over new symphonic works of Spanish brutal struggle of arms. This is truly an encouragement to the progress of esthetic ideas; but on this side as well as beyond the frontier there has predominated a regenerated spirit of devotion for the old classics that the famous Weingartner has expressed so concretely in the phrase "Let us go back to Mozart."

This is truly glory but seldom bring any pecuniary recompense. The profits derived from royalties are seldom a remuneration for the expense, labor and mental effort which is indispensable in order to make a public presentation possible. If a work is favorably accepted by the critics and the public the composer must look to France or Engineering

ported by the organization of Philharmonic societies. These orchestras have also included in their programs works which were of importance and deserving of praise.

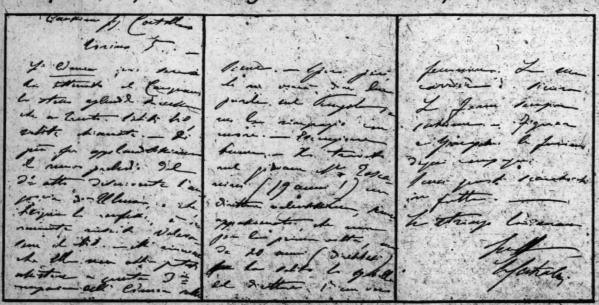

In Madrid Señor Lassalle with his offichestra has presented (for the first time) two of Mahler's symphonies and one of Bruckner's. The Filarmonica of Madrid has also given us for the first time one of Glazomoff's most beautiful symphonies. This organization has always presented interesting programs of modern compositions combined with the brilliant works of Wagner, Brahms and Strauss.

acter which have visited us and that we recollect with pleasure are the marvelous Sistine Chapel Quartet and the colossal choir of the same chapel.

The Russian Opera has opened at Barcelona where it has been received with enthusiasm. Madrid, I regret to say, cannot hope to be as fortunate; but we have in its stead the German Wagnerian Opera which has met and is meeting with the success of last season this year under the leadership of Karl Muck, to whom the Madrid public is indebted for having heard the marvelous Sistine Chapel Quartet and the colossal choir of the same chapel.

be 1886: Freely turned into English it runs as follows:

Turin, 5th.

Dear Mr. Costelli:

Last night "Edmea" obtained the same splendid success at the Carignano that it obtained in Trent. The same encores' the recalls. Also the new prelude to the third act, describing the sorrow of Ulma, was loudly applanded. I, do not hesitate to declare that the success was great.

They want it again.

I am sorry that you could not attend this third representation of Edmea." I hope, however, you will put a few words about it in the Pergola; and for that I shall thank you. The axecultion of the work was excellent. I found in the young man Toscainini (18 years old!) a very valuable conductor; sure of himself, yet abounding in emotion. He seemed more like a man who had been conducting for 20 years than like one who was taking up the baton for the first time. He is very remarkable, His career is secure.

The Fernt always sublime! Figuer and the Fanone, worthy sasociates. Excuse this hasty goestp. I shake your hand.

Yours fondly,

"I have it!" he exclaimed. "Whistler it his Ten o'clocks. You shall go it one better. You shall give him at Elevan o'Clock."

Perhaps I looked dismayed. At all vents, he had a forrential explanation aimed to persuade me. There was a pending first night of the Society of American Artists. After the ecoption he would bring the "crowd" fown to the studio and I should set in my screen and perform. "They have no idea," said Chase, "of the charm of those photographic records of life. There are builty things there. They know you as a critic. Let them hear you and see you as an artist. They will be amazed at what they shall see. And they will fistening; at least that was my impression in the midst of the experiment. The crowd came. A gathering so distinguished could scarcely have been accomplished except by an expedient such as Chase had devised. The turning of of the lights, essential to the functioning of the stereopticon, happened mercifully, for I was appalled by the presence of the celebrities whose work I had had the impudence to appraise in print, and who now had me in their hands. La Farge, Weir, Wiles, Thayer, Beckwith, Robert Blum, Champney, Twachtman, J. G. Brown, George Inness, Elihu Vedder, St. Gaudens, W. J. Baer, there were two core of them; and they did listen to my introduction, before the lights dimmed and the pictures began. After that the audience took charge of the occasion. I think you would say that it was an appreciative audience, but the appreciation took an embarrassing form. A picture of New York boothacks in action elicited a glad recognising shout. "A perfect J. G. Brown!", A Park scene drew forth, "A Chasa to the life!" "Ah! a Thayer!" was the quick comment on a tenement Maconna. And when a street vista included one of New York's worst atrodities of sculpture there was a groaning voice to say, "Imagine how St. Gudens feels!" Of course the comment went farther. Voices at the

Not that the poet's relation to nature should or could ever be descriptive and objective alone. The eighteenth century pastoralists made the mistake of trying to reproduce nature as they knew her—"Follow nature first" is what they all say—by a process of unnatural language, which is quite a different thing from seeing things as they are, and modifying them into the mysterious ferment which we recognize as poetry. The Elizabethans, on the other hand, were on better emotional terms with nature, but we

Or compare and given us a glimpse of glooming a good modern yacht, swift, lithe, and plain, with a lumbering heavily gilded where. in the vivid image of the man. I am thinking of the ejaculation of Dr. Edward Everett Hale: "Black, this idea of a play in pictures is so inevitable that I'm mortified to think that I didn't invent it myself!"—Alexander Black, in "The Latest Thing and sixteenth-century galleon, or even with a Chinese state junk; the yacht is far the more beautiful though she has not Black, in "The Latest Thing and Other Things."

One Day's Wonders.

The first time I made the journey from Lucerne to Milan it was en a day of late autumn, setting out in the early morning by boat from Lucerne, to travel up the lake and join the southward train at Fluelen at the further end.

Being late in the season—too late for the summer tourists, too early for the summer tourists, too early for the more beautiful though she has not a hundredth part of the ornament. It is she herself that is beautiful, because her lines and structure are right. The others are essentially clumsy and, therefore, ugly things, dabbed over with gold and paint. Now ancient Greek things for the most part have the beauty of the yacht. The Greeks used paint a good deal, but apart from that a Greek temple is almost as plain as a shed: people accusfomed to arabesques and stained glass and gargoyles can very often see pothing in it. A Greek statue has as a rule no ornament. It is she herself that is beautiful, because her lines and structure are right. The others are essentially clumsy and, therefore, ugly things, dabbed over with gold and paint. Now ancient Greek things for the most part have the beauty of the yacht. scarlet and crimson and gold and bronze, the autumn tints of the forests, reflected in the still water. Above, the pine trees in their service ranks, stood dark and solemn, their silent multitudes as closely set as banks of moss. Far beyond, against the pale and luminous blue of the autumn sky, the snow peaks lifted their radiant crests.

An hour at Fluelen, set on the shores of the lake at the foot of the mountains; and then, boarding the train, away through the great St. Gothard passes to the south. First, the long ascent, through rocky walls, by wet steep crevasses, with vistas of glorious Alpine scenery, of flashing, foaming torrents, of little gunny meadows, and try-like chalets, and dark ranks of pine, until we reached the highest point. Then the long, lovely descent as we dropped down into Italy, past white villages, with their little churches, pearl and ivory against the hillsides: Lugarno and the lakes in the luminous aunset glow, and the

came States, some stir, perhaps, of home memories or tender shadow of ancestral worthiness, must have been diffused by these pictures, as they went for exhibition to various parts of the country, and must have been felt by those who judged; for the medals and prizes they have won, hall from west and south as numerously as from the northeast. Also publicly owned, have found honored habitation in widely distant art cen-ters. "Mallards" is in Pittsburgh. "Autumn' and "Evening Light" in Cincinnati, "Girl Playing Solitaire"

related the fragments of conversation and all else that could not be told by the pictures. Among many descriptive terms, "picture play" met with the greatest favor. Thus, "Miss Jerry," among the produced in 1894. Among all the early comments on that adventure (four plays cover a period of six years), one brings, perhaps, the warmest surviving feeling, doubtless because of something

"in seasons lone and long, The spirit rare of northern song Keeps in dreams, remote, apart, The cadences of her own heart."

What Should the Poet Know?

The question whether the poet, whose subject is natural life or landscape, should know what he is talking about, looks guilelessly simple. It is axiomatic that he should, we say; the truth of a general survey of "na-ture-poetry" shows that he does not. The "nature-poet" and the scientific expert whose life is passed in a na-tural history museum are popularly

river does not run backwards on its course; the scene is not phantasmai, and the poet builds his cloud-capped ayrie, upon the solid laws of the natural order. The example of Coleridge is, indeed, more than a straw to the rash adventurer upon this dispute, whelmed in a sunless sea of argument. The landscape painting, in "The Ancient Mariner" is as delicately precise, as observant, as scrupulously defined and as veracious as a seedsman's catalogue, and a poem river does not run backwards on its and silver moon, with fleets of stars.

done little straying for subjects.
Yet something—yes—much, of the charm of New England's scenery, some prestige of its vivid history as one of the earliest colonies that be the staging of himsen passion and inthe staging of himsen passion and inthe staging of human passion, and inanimate lumber again when the play no effect from any other cause, and was over, while nature was a general shop keeper usefully combining the functions of "artist-colorman" and costumier. But when Wordsworth makes an analogy like "more dreary cold than a forsaken bird's nest filled with snow," he suggests a par-ticular use as distinguished from a general exploitation of natural life, which keeps the balance between truth to nature and truth to art, and knowledge and observation, whose possibilities for poetic simile and illustration are incomparably richer than any to be got out of fable, legend, myth, or picturesque convention.—H.

aused by the primary derangement.

Christian Science, however, presentdisease, is not causative. This Science ing an entirely different view of further declares that with even a causation, declares that all these ma-small understanding of these facts, terial theories of incidental causation the sincere student may prove for are not true. This Science declares the himself the noth nguess of any theory are not true. This Science declares the truth about causation as vested in God, good, only and not in evil. As this is understood, and the action of the carnal mind in framing mere beliefs as statement down as a part of the law causative is discerned as being the of Christian Science (Science and effect of error, or wrong thinking, one Health, p. 419): "Neither disease itself, may soon discover how Christian Science annihilates these false and intell'gence with which to move itself detrimental theories of causation, about or to change itself from one

As these facts are understood, and the omnipotence and omnipresence of God as Spirit is realized through the Christ, Truth, revealed in Christian Science, humanity will refuse to acpower.

First, let us secure a brief view of the teachings of Christian Science and penalty; and healing as taught in the Bible will become more spontaneous. Multitudes may thus be aided to see the grandeur and power of the finale of true creation as stated in the first chapter of Genesis: "And God saw every thing that he had is God." The universe reflects God. There is but one creator and one creation." On page 207 of the same derful statement just as it was written-as including all that really exists, Even a simple proof of its verity in healing rejoices the heart and enno effect from any other cause, and courages a living faith in the loving-there can be no reality in aught which kindness of God.

"All Sorts and Conditions"

For some years I knew Walter Besant very intimately. I saw him constantly at his cosy rooms in Adam explores a terra nova reached by Street, London, and I visited him, first in his modest little home at Gayton Crescent, and later at the fine house which he built for himself with such pride and joy . . . at Frongal.

Few people know how scholarly a man he was. A great authority on mediæval French Poetry, he was also an interested student of Palestine Exploration, and a warm supporter of the Fund which provided the necestween blocks of tall tenements not enough for one man, he was a Like old market women;
Or stealing mysteriously through long, low brown-stone blocks at night,

Like old market women;
every street and passage in East London, and I look back, with mingled pleasure and pain, for what can never be again, to visits I took with him— Lonely lamplights retreating behind traordinary-looking and speaking characters, precisely as if they came out of the pages of Dickens; and once of the pages of Dickens; and once also to the Bethnal Green Picture Gallery.

He was looking for a portrait of stored with anecdotes and stories of

whiter sports—the little steamer was a most empty, and all the places where the founded, as we zigasaged to and fro across—the lake during the four hours trip were well-nigh deserted, with closed and shuttered hotels. Only a few peasants, with cattle, pigs and chesses, came aboard, as we made our way from one little landing piace to another, past Tellsplatt, where the patric William Tell landed, and on-up to the lake to reach Fluelen at midday. And yet, surely no season in the whole year could have offered more than that November day!

All along the shores the lower slopes of the mountafus were ablaze with scarlet and crimson and gold and bottle sarely and a natural points a motor reaches and severity which disponits a motor reaches of the mountafus were ablaze with scarlet and extracted a an old scholar with a long pen in his hand.

. The life in Gayton Crescent was the most simple and unpretentious possible, and there was a trait in it I have found most rare in my literary experiences—indeed confined to Walter Besant and Mrs. W. K. Clifford: both he and his wife, a most sweet, serious, gentle lady, would make a point of introducing anyone shy and of no im-portance to the most distinguished amongst the guests, Professor Palmer, Mr. Arthur Paterson—but indeed I' could fill a page—and all in the most informal and friendly way.—Frances Low, in "The Landmark."

A tool is but the extension of a man's hand, and a machine is but a complex tool. And he that invents a machine, augments the power and the well-being of mankind.—Henry Ward Beecher

Liberalism Working in Japan

THE recent disturbances in Tokyo, when the somewhat riotous crowds were dispersed not too gently by a noticeably aggressive police, have not been entirely understood in the West. American papers told of a demand for "universal suffrage," and reported later the defeat of the measure in the Diet by a vote of somewhat thing like two to one. From which it was concluded, perhaps not unnaturally, that the Japanese reactionaries stood unscathed and the chances for an increase of popular control were as distantly slim as ever-which is the half-truth so much more misleading than the absolute

The bill under the Diet's consideration was not, to begin with, exactly what the Occident would accurately call a proposal for equal suffrage, with sex no longer tobe a barrier to the franchise. That detail was included, and certainly increased the majority figures against the measure (for the Orient's regard of woman as utterly insignificant is not readily to be overcome), but a greater interest in the Bill arose from its proposal to throw open the vote to males of 21, instead of 25 as at present, and to lower the qualification as to taxpaying. In other words, it was a plan to bring in what one calls universal male suffrage. It was behind and beyond even this, however, that lay the real and paramount importance of the

The government party, the Seiyukai, withstood it to a man, in the undoubtedly well-founded belief that such a move would bring into active election warfare a considerable array of citizens of the lower social and laboring orders, distinctly democratic in viewpoint, truly "forward looking," and therefore opposed to a continuance of class control, militaristic usually, and ultra-conservative always. By the same token the Kenseikai opposition was all for the measure. It promised a strengthening of their hands. But more worth the marking than either of these possi-bly obvious details is the fact that behind this agitation. as the main propellent force indeed, stood the Ozaki Independent organization. Heretofore, this relatively new body in Japan's political thought has confined its activities almost wholly to local questions rather than federal matters. Now, in the larger confidence of increasing numbers, it has emphatically shown itself a national factor. For this time, it is true, it has acted in collaboration with the official Opposition, though only for the temporary purpose of offering greater threat to the government group, and not at all as implying any permanent merging of its own promising self in any

There is no doubt that the Ministry was frightened; the unprecedented number of the police on emergency duty would prove this if nothing else did. That the Ministry won (a foregone conclusion under all the circumstances) is less important than that the world has seen in Japan a genuine first step taken along the path of a practical popular awakening in matters political. For some years the Occident has been told that its best chance of a demilitarized Japan lay less in what might be done from the outside than what was certain to be promptly done from the inside whenever a genuinely democratic influence might grow to such proportions as to make its demands heard and considered. Such a party, formed by Kurio Ozaki, is now showing itself a sturdy youth, with the infancy of theoretic days well behind it and the manhood of healthy participation in national'affairs in a hear future.

The world needs this influence. Much as the Washington Conference accomplished for China (which is the true heart and core of the Far Eastern riddle), the ultimate question there yet remains to be answered. The United States, pledged not to fortify Guam, has thus withdrawn its actual naval effectiveness, for, with Hawaii its most advanced base, the Japanese archipelago lies beyond the cruising radius of Uncle Sam's ships. For years to come, then, Dai Nippon, with impregnable maritime bases and a conscript army, will probably remain predominant over the Asiatic littoral. The influences of foreign sort that may lead her to form and carry forward Chinese or Siberian policies not objectionable to Western ideas and ideals are diplomacy and the argument of self-interest, and both are to be held far from poweress. But the strongest influence must be of domestic label; that of Ozaki liberalism. Its growth to effective strength and enduring power is a matter of highest interest to the Occident.

A. New Invasion of the East

IMES without number it has been said that history repeats itself, and the truth of the statement has been almost as frequently proved. But it may as confi-dently be asserted and reiterated that the old order changeth, for this also is true; and it is well that it is, for vain repetitions, the clinging to old theories, some venerated only because of their age and some cherished even though they have been repeatedly proved false and unsound, is neither wise nor commendable. The world would indeed be a poor place in which to live if mankind did not seek out new ways, new ideals, and have new purposes and ambitions. And so it is not always that "the star of empire westward takes its way," at least to the exclusion of all progressive movements from west to east. It must be admitted that in the United States the tendency has too often been to believe that in its eastern civilization and development there was to be found the seat of culture, of progress, of political wisdom and of sophistication. And this was true at a much earlier period in the country's history, as will be generally conceded.

But as there grew up in the east, a product of its schools and colleges, its homes, its intensive industries, a sturdy and self-assertive civilization which could not confine itself to its native environs and which of necessity overflowed and expanded into the unlimited fields to ould indeed be a poor place in which to live if man-

sity overflowed and expanded into the unlimited fields to the westward, so now there is being felt the reflex, the

tidal undulation of that pregnant force as it turns, in its fullness, backward from west to east, as the ebbing tide is sure to return. The vaunted culture, the erudition, the purposeful training and education which were the outgrowth of the earlier civilization of the east, would indeed have been purposeless had not their results been-felt far beyond, the limits of New England and the Atlantic States.

So it is not surprising that out of the west there . come, in these days, prophets, teachers, leaders, from among the men and women who are proud to give credit to the influences, direct or indirect, upon their lives of what they call the older civilization of the east.

Of course no one very seriously contends, and no one should ever have contended, that only a reflected wisdom can come out of the west. A half-century ago Lincoln came out of the west to-proclaim the new-old gospel of abolition. And there have been scores of lesser prophets from the west in more recent years. There is no need to name them. They taught no doctrines peculiar to their habitat, no theories which were selfishly conceived. They spoke for all the people, pro-claiming a common right and what they believed to be a universal efeed, usually political or economic in its broad philosophy. And now there has come from Iowa a courageous crusader to tell the people of the east some-thing of what many have only vaguely regarded as a new political influence in the country's economic affairs, the Agricultural Bloc. This pioneer is Representative Dickinson, proclaimed as an "invader" of the east, with fortitude enough to go into an "enemy country" pro-tected only by what he believes to be the incontestable soundness of the theories he teaches. He is a persuasive advocate, for he teaches that his doctrine is not sectional but national in its application, just as Lincoln taught that abolition was not a sectional but a fundamental issue, and just as Bryan taught that the doctrine of "free silver" was applicable nationally and internationally, if applicable at all. Mr. Dickinson, were one to listen to what he has to say, perhaps would be able to convince the people of the east that the cause of the western farmer is also the cause of the eastern wage-earner and manufacturer. He is one of the advance guard, apparently, of those active campaigners who, having proved their strength in the national legislature, now seek to educate the people of the country to an understanding of what their cause represents, economically and politically. Those who may be inclined to regard this teaching indifterently should not make the mistake of assuming that its exponents have not been trained to advocate their cause. Perhaps they may prove to be those who, representing an earlier civilization, have traveled far to test and to prove its worth and its adaptability to the larger needs of the people of the world.

· Liquor and the Law

WHEN a justice of the Supreme Court of the United States, a bishop of the Episcopal Church, and numerous other eminent persons take occasion to point to the violation of the Volstead Act as evidence of the growing popular disrespect for law, opponents of prohibition seize upon their utterances as proof that prohibitory legislation is a failure. "The Volstead Act is not effectively enforced," they say, "therefore let it be repealed. If prohibition cannot be enforced, we must return to the former method of license and regulation of liquor traffic."

To judge from most of the arguments of this kind that find expression in the newspapers, it would seem that the people using them are ignorant of the important fact that in no State in which the sale of higuor was licensed was there any approach to compliance with the law. The laws forbidding the sale of on Sunday, after certain hours, and the various other restrictions on the traffic, were openly and willfully violated by the great majority of the saloons. Despite the fact that the saloon owner was required to give bond that he would comply with the law, and that conviction of lawbreaking carried with it in many cases loss of a license for which large sums were paid, it was a matter of public knowledge that to most of the retail liquor dealers the law was a dead letter. Once in a while, as when Theodore Roosevelt was Police Commissioner for the City of New York, a serious attempt was made to have the laws strictly enforced, but when the temporary reform movement had subsided the saloon returned to its old ways and showed the same disrespect for regulation that is now manifested toward prohibition.

To a very large extent, it was the greed of the liquor manufacturers that was responsible for the general violation of the regulatory laws. In all the large cities a very considerable percentage of the saloons were owned, or controlled, through chattel mortgages, by the liquor interests, who aided in establishing three or four times as many saloons as would otherwise have existence. The surplus saloons could not be made to pay if they complied with the law, so the spectacle was presented of side doors opened on Sundays; the sale after legal hours, and the "family entrance" to rear rooms that were maintained as resorts for race-track gamblers and the vicious and depraved of both sexes.

Nor should it be forgotten that under license and regulation there were thousands of unlicensed dealers in intoxicating liquor. An official of a liquor dealers association stated a few years ago that, according to his information, there were more than two thousand restaurants and other places in New York City that were selling liquor without a license. While spasmodic raids were made against some of the offenders, the great majority were presumably paying somebody for ignoring the constant violations of the law, thus adding bribery to their

other delinquencies.

The problem of securing a strict enforcement of the prohibitory laws is one that demands the earnest consideration of all good citizens. The suggestion of a return to regulation as an alternative to prohibition might have some weight if it could be shown that license laws would be obeyed. The past history of the liquor traffic under license shows that the retail dealer in liquors was a persistent lawbreaker, and there is no reason to believe that the repeal of prohibition would inspire him with a respect for laws that he formerly flouted.

Taxation in Ancient Egypt

R. CLARENCE S. FISHER of Philadelphia, who is in charge of an expedition sent by the University of Pennsylvania to excavate the ruins of Thebes, the ancient capital of Egypt, reports the discovery of a most important collection of demotic papyri, containing among other records of King Ptolemy Philadelphus an account of the methods of taxation by which the Egyptian revenues were raised. While those papyri have not yet been fully translated, it is probable that they will show that the collective wisdom of 2400 years ago on the subject of taxation was quite up to the high mark set by modern statesmen and economists.

Thus it is known that to the Egyptians the cat was sacred animal, regarded with the same reverence that we moderns show to the institution of property. As in some rural communities today the number of dogs kept by a citizen testifies to his social standing, so an abundance of cats showed a prosperous and devout Egyptian. Acting on the theory of the more cats the greater the prosperity of their owner; what can be more likely than that the cat tax was one of the principal sources of revenue? King Ptolemy doubless argued that since the chief, purpose of government is to encourage industry and thrift, this could best be accomplished by taxing cats, the property of the industrious man, who would have to work harder and save more in order to meet his tax bills. The toiler on his patch of Nile-watered land would be happy at his sixteen-hour-day task as he reflected that even though a large part of his produce went to support the armies sent against Ethiopia, he was being honored by the recognition of his piety and cat-accumulating

It is doubtless from the Egyptians that there was: derived the theory, expressed in most modern tax laws, that since the acquisition of property is highly desirable and deserving of public encouragement, the industrious and thrifty man should be given special honors by having a large percentage of his earnings taken in taxes so that he will have an incentive to work still harder. If taxing cats increased the number of those animals and forced their owners to greater efforts, why should not taxes on new buildings, factories, or stores have the effect of encouraging their greater production?

It is expected that the newly discovered papyri will also give some interesting information concerning the peculiar type of ships used by the Greek rulers of Egypt in their trade with Crete, Phœnicia, and other countries. As the Egyptians enjoyed the benefit of a high-protective tariff, they did not want any foreign goods brought in, so their ships were designed to carry freight out of the country, but could bring nothing back. If the secret of these ships can be learned it will be of great value to the statesmen at Washington who are wrestling with the problem of building up a merchant marine while enacting a new high-tariff law that will make necessary the construction of steamships designed on the Home Market. Club plan of encouraging the export trade by shutting

Working for World Friendship

UIETLY but persistently active throughout the United States, an organization, backed by the most influential educators, is at work, with slight public notice, in a direction that promises most valuable future results. It is the American School Citizenship League. Its honorary president is William H. Taft. Its secretary, who supplies a large part of the energy of the organization, is Mrs. Fannie Fern Andrews of Boston.

While various other associations are either wondering what they can do to improve the tone of American public life, or are making more or less experimental efforts in that direction, the American School Citizenship League has a definite, thoroughly worked-out program with these three high objects in view:

1. To define the meaning of American citizenship. 2. To train the school children of today in the duties and responsibilities of citizenship, so that they will form a body of intelligent, dependable citizens of

3. To cooperate with educational agencies in various countries for the promotion of international under-

To accomplish the first two aims, a comprehensive course of study in "citizenship and patriotism" has been prepared by experts of the Massachusetts branch of the league and is producing results in a great number of American public schools. The course is arranged by grades, is subdivided into months of the school year, and covers the child's work from the first to the eighth grade. It not only defines citizenship in all its aspects in a simple, attractive, appealing way, but throughout the whole course the inescapable interrelations of all hations with one another are explained and emphasized.

The third object of the league, to cooperate in promoting international understanding, is accomplished through a world-wide essay contest, by which study of world relationships is encouraged, and by an international bureau of education, through which channels of communication with educational leaders and movements, in various countries, are kept open.

In these days, when the vital necessity of interna-tional good will, acquaintance, and friendship is being pressed home on the consciousness of the world, an institution like the American School Citizenship League deserves warm encouragement and support.

Initiative in Producing

E DGAR VARESE may be called, more appropriately than anybody else, perhaps, the leader of the musical progressives in New York. He is not, indeed, to be found at the head of the line of march all the time. Carlos Salzedo now and then serves as captain of the hosts; or as corporal of the guard, if "captain" and "hosts" sound too big. For those who acknowledge them-selves as belonging to the advance are, without doubt, a small minority of the musicians of the city. Formerly Mine. Eva Gauthier, the soprano, was the principal, if not the sole, champion of modern music in New York, concert halls. But that was in war time. Today Mr.

Varese, as a representative of numerous activities, rather than a special department of performance, must be regarded as one of the most broadly influential persons, to say the least, in the movement:

Briefly to review matters, Mr. Varèse, soon after the armistice took effect, and when the reconstruction of art and manners became an assured process, was asked by a group of guarantors to get up an orchestra and devote his main thought to the production of compositions of recent date. He no sooner began the enterprise, however, than the guarantors, apparently regretting their audacity, abandoned him. Never, surely, was there a more remarkable instance of people beating an artistic retreat. The orchestra which he started made itself into an ordinary conservative group, with Artur Bodanzky. of the Metropolitan Opera as conductor, and set about playing the works of the old repertory and following in the track of the established organizations.

It gave seasons of concerts on traditional lines, with the outcome that it did not specially justify its existence. Recovering after a while some of the initiative with which it started under Mr. Varèse, it called Mr. Mengelberg, the Dutch conductor, renowned for his interest in the symphonies of Mahler, to act as Mr. Bodanzky's associate. For its final move, it seemed to go completely conservative, merging itself with the historic Philharmonic Society. But arrangements were made whereby Mr. Mengelberg was to continue taking part in the conducting. And lately, to what ought to be Mr. Varege's gratification, the Philharmonic Orchestra, under the direction of Mr. Mengelberg, has brought out the Mahler symphony No. 3 in D minor, presenting this work of vast modern dimensions for the first time in New York.

The Mahler symphony was composed in 1896. Wherefore Mr. Varèse can boast of having set things in motion which brought the old Philharmonic Society not, to be sure, down to date, but down at any rate to within two decades and a half of date.

Editorial Notes

THE EGYPTIAN MAIL, Cairo, has on its staff a music critic of a comfortable disposition. In the course of a review of a chamber concert he admits that he enjoys listening to music, "particularly if one manages to snuggle into a big armchair or a settee behind the pillars away from the crowd." Later, however, his equanimity was apparently disturbed, for he describes the Tartini-Corti variations on a Corelli Gavotte as "a case wherein, a superfluity of cooks produce a pyrotechnic salad." He condemns the playing of such a tune, for, says he, "if a player have the skill to throw off those rockets, why waste his time on such poor stuff?" In speaking of a quartet, the critic says! "It is at times like contrary winds that wrestle together; also scratchings on a slate were suggested." Mozart was "presented chivalrously"; Grieg is likened to "a good conversationalist and no more." Perhaps other critics will only feel inclined to imitate, their Egyptian confrère in regard to "a big arm-

THE young Frenchman is emancipated. That is, when he reaches the age of 25 years he is emancipated. Having arrived at that ripe mafurity he is now permitted to marry without obtaining the consent of his parents.

The bill rendering this possible (it has just been passed by the French Chamber of Deputies) lowers the age limit from 30 years. Of course, it was unreasonable to arbitrarily make 30 the age of discretion in such matters, but there is much to be said for establishing it at 25 years. Elopements are practically unknown in France, due to the fact that two silly young people, in their teens, cannot get married anywhere. American lawmakers could well pay attention to this and so attempt to lessen the ratio of unfortunate marriages.

It is interesting to note the proposed establishment of the first national school of the American Federation of Labor at Cincinnati, O., in the near future. Its object will be to train Labor leaders so that they may cope with representatives of Capital. The proper title for the undertaking will be the American Academy of Christian Democracy. There is something that causes one to stop and ponder a minute on this title. If Labor is serious and will develop honest, impartial leaders, such a move is to be applauded, but if it means a group of intolerant leaders who see but one side of the question, and that from a deeply rooted attitude, such an undertaking is dangerous.

ANNOUNCEMENTS stating that Sir Joseph Duveen, the art dealer, has lost \$25,000 worth of emeralds in the mails, arouse memories of those days when unsophisticated newspaper city editors played up numberless stories narrating the losses of jewels by well-known actresses. It was a dull week in which at least three popular stage people did not lose their jewels. If Sir Joseph Duveen really wants to get into the papers he should lose the "Blue Boy" instead of two emeralds. That calamity (one shudders to think of it) would put him on every first page in the world.

THE Town Council of Hammonton, N. J., is in a quandary over \$2000 which has accumulated in the treasury with no evidence as to how it got there. Try as he may, the Town Treasurer cannot discover the reason for this surplus. An auditor is going to investigate the situation. Putting aside the jocose remark that possibly the \$2000 will disappear after the auditor is through, one can but point to Hammonton with pride, for that town certainly restores confidence in American institutions. The idea of town officials plaintively expostulating because there is too much money in the treasury is

ONE of E. H. Harriman's sons has announced his determination to run a hotel. Those unfortunates who have been compelled to dig down into their wallets in order to meet bills at many American hotels will speedily reach the conclusion that young Mr. Harriman possesses some of the instincts of big finance that made his father, famous. He shows his modesty, however, in only owning the hotel, when he might well be its head waiter.
